Alert Review Committee Update

New Discern Alert for Electrolyte Replacement Protocols

On **Tuesday, September 15th**, a new alert will fire upon initiating any IV or PO potassium replacement protocol or IV magnesium replacement protocol on a patient who meets one or more of the specified exclusion criteria. The alert instructs the user to order electrolyte replacement outside of a PowerPlan and is intended to reduce rework and delays in electrolyte replacement.

Patient exclusion criteria:

- Age less than 18 years
- Dosing weight less than 50 kg
- CrCl 30 mL/min or less
- Creatinine 2.0 mg/dL or greater
