Table of Contents

[Click here for the latest Registration, Scheduling, Referral Management, Experian, Charge Management, and other Revenue Cycle updates!](#)

All Venues

**Dynamic Documentation**

➢ **Text pulled forward from the Last Assessment and Plan (last A&P dropdown), or tagged items from the same note, will now display as consolidated footnotes on a single line in a note.**

- • Previously, footnotes for each tagged item were shown separately. This enhancement reduces clutter in the footnotes of clinical documents, improving both readability and usability in dynamic documentation notes.
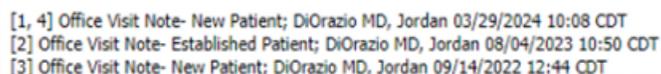

[1, 4] Office Visit Note- New Patient; DiOrazio MD, Jordan 03/29/2024 10:08 CDT
[2] Office Visit Note- Established Patient; DiOrazio MD, Jordan 08/04/2023 10:50 CDT
[3] Office Visit Note- New Patient; DiOrazio MD, Jordan 09/14/2022 12:44 CDT

Auto Text in Orders

➢ **Auto texts are available within the order entry fields and order comments.**
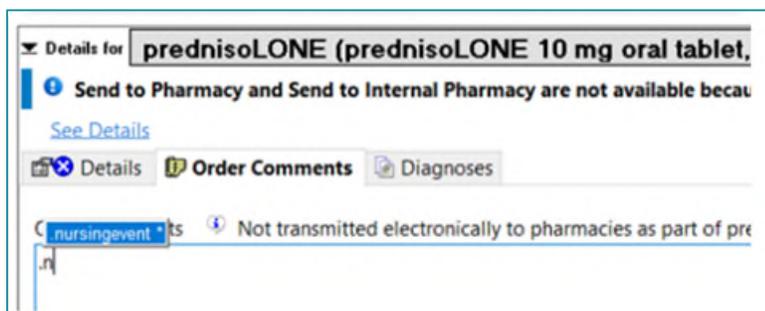

Nursing

Notifications

➢ **Notification will fire for invalid date/time in PowerForms and will be informed via notification if an invalid date or time is entered. This applies to PowerForms and Form Browser applications, which previously lacked this functionality. Previously the field would reset to its default state with no explanation.**

➢ **Notification will fire if trying to document on a discharged encounter or will be warned if trying to add a time column outside of the encounter date. This applies to Interactive View. Previously no warning when documenting in Interactive View with those parameters.**
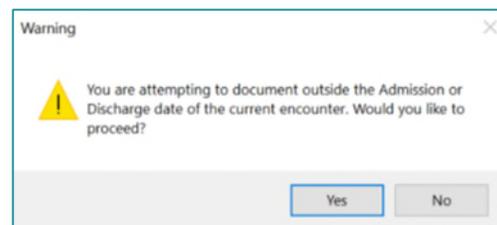

Laboratory

PathNet Updates

Additional Columns in Pending Inquiry; to edit within Pending Inquiry, click View Menu > Customize > Display Options.

- Collection Priority
- Pathology Specimen Description
- Specimen Type
- Body Type

- Priority Column is renamed to Reporting Priority

➢ **A container event is generated when a transfer action is initiated in Pending Inquiry to transfer orders from one service resource to another. The details of the container event are viewable in container inquiry:**

- Transfer Action in Pending Inquiry – All Details.
- Transfer Action taken on Lytes Order – Selected Order > All Details.

➢ **Container Event in Container Inquiry:**

- Event Name – Service Resource Transfer.
- **From** and **To** service resouces display in Detail Column.
- More Details column displays with a button that can be selected to open a Service Resource Transfer Details window.

➢ **Recent Patient List in Order Result Viewer:**

- Update allows Charge Viewer from within Order Result Viewer.

➢ **Branch to Charge Viewer from Order Result Viewer:**

- In Order Result Viewer, select an order for the patient identified.
- Select Charge Viewer on the toolbar to open Charge Viewer.

➢ **Blood Bank Transfusion will now have a Yes to All button added to the following system messages when Dispensing and Assigning products:**

- Current ABO/Rh could not be found.

- Second ABO/Rh determination could not be found exception.

➢ **Selecting the Yes to All button has the effect of Answering Yes with the same override reason to that system message to subsequent products added to the patient's Product List that trigger that same message.**
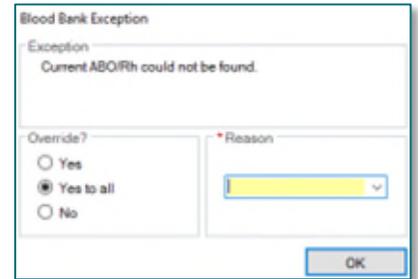

Anesthesia

Anesthesia Database Build Tool

➢ **When actions associated with macros in Anesthesia are modified in Anesthesia Database Build Tool, the existing versions of actions are retained in the macros, indicated by an asterisk before and after the action name, and remain available for documentation.**
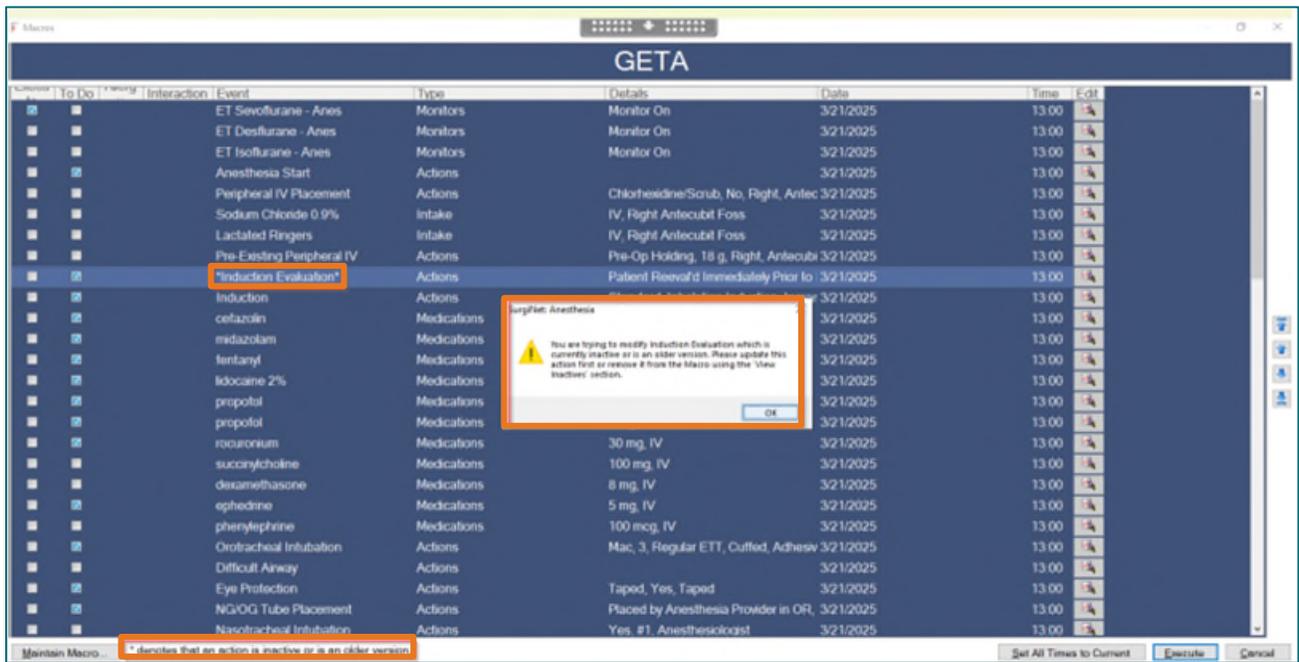

Anesthesia – Optimize the Other Button

➢ **In SurgiNet Anesthesia, the Other button is optimized in Medication and Intake Selection dialog boxes by adding search functionality to improve performance.**

Clinical Inventory Management

Physical Count Update

➢ With this enhancement, unnecessary lot number details for incoming lot type items are no longer displayed when a count sheet is opened or closed. Additionally, sheet reports in Physical Count display quantity details only for incoming lot type items and no longer display unnecessary lot number details:
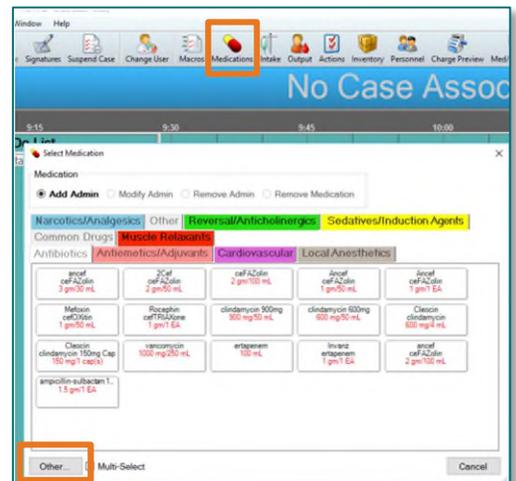

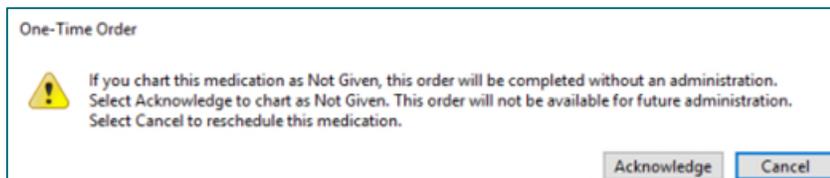

Radiology

BIRADS

Category 0 in BIRADS Version 5.0 is now displayed as 0: Incomplete. This applies to Mammography, Magnetic Resonance Imaging (MRI), and Overall Assessments.

Pharmacy

Alert

➢ When a one-time dose is charted as not given or not done, an alert is displayed to inform you that the order will be discontinued.
