CommunityWorks Monthly Update

All Venues

Problem List Cloud

- New tools for evolving problems, improved classification filters, problem summaries, and HCC indicators, with details below:

The screenshot displays the 'Problem List' interface. At the top, there's a search bar and a dropdown for 'Add As: This Visit'. Below this, a table lists medical problems. The 'This Visit' tab is selected, showing four problems with their respective codes and flags. The 'Ongoing' tab is also visible, showing one problem. The interface includes a 'Classification Filter' dropdown and a 'Resolve' button.

Priority	Problem Name	Onset	Code	Flags	Actions
1	Chronic obstructive pulmonary disease with (acute) exacerbation	--	J44.1	HCC	☒ This Visit ☐ Ongoing Evolve
2	Knee pain	--	M25.562	--	☒ This Visit ☒ Ongoing Evolve
3	DMDD (disruptive mood dysregulation disorder)	--	F34.81	--	☒ This Visit ☐ Ongoing Evolve
4	Diabetes type I	--	E10.9	HCC	☒ This Visit ☐ Ongoing Evolve

Ongoing Resolved

Classification Filter: - Select -

Problem Name	Onset	Code	Flags	Actions
Tobacco user	--	175325014	--	☐ This Visit ☒ Ongoing Evolve

- Problems component will be renamed to **Problem List**.
- Separation and filtering of Problems into **This Visit** and **Ongoing**.
- Improved Nomenclature Search.
- Display of Classification Filters such as Dietary, Family History, Medical, Nursing, Past Medical History, Patient Stated, SDOH, Social History, Surgical History.
- Ability to **Evolve** Problems; a new ability to change the problem's code as the problem evolves. It also allows the ability to view a timeline of the problem's evolution.
- Narrative for Problem Summary can be viewed from the problem detail pane.
- **Resolve** action allows a treated or managed problem that is now considered clinically stable to be resolved. The problem will now show as part of the patient's problem history
- **Remove** action is the ability to remove an incorrect problem on the patient's chart.
 - The problem will be cancelled but still discoverable.
- Ability to Favorite Problems.

- Problem Summary is a narrative summary to all ongoing problems. This is intended to provide a brief synopsis of the management of that problem and current state.
 - If multiple problem summaries exist, the user can see all prior problem summaries by selecting the “View History” hyperlink. A comment icon will display if problem summary or comments are documented.
- HCC will now display in the **Flags** column.
 - HCC are tracked and reset on a calendar year basis (January 1 – December 31).
 - Diagnosis captured during this period determines the patient’s Risk Adjustment Factor (RAF) for the following year’s payment. Even if a condition is ongoing, it must be re-documented every year to be included in the risk score.

Ongoing Resolved					
Classification Filter: Medical X Nursing X					
Problem Name	Onset	Code	Flags	Actions	
CHF exacerbation	--	2973838013	HCC - Due	☐ This Visit	☒ Ongoing
Tobacco user	--	175325014	--	☐ This Visit	☒ Ongoing

Recommendations

- Automatic qualification rules for Glaucoma Screening and Aspirin Therapy for Prevention of CVD will be removed, but the recommendations will remain available in the product.

Emergency

Ancillary Personnel Form

- The ED Ancillary Personnel form allows for additional personnel documentation at one time instead of needing to document on the form separately.

Women's Health

FetaLink Disassociation

- Reminder: When a patient's monitoring is completed, the patient needs to be disassociated from the monitor.

STEP 1: From the patient chart in FetaLink, click the **Monitor Association** button.

STEP 2: The Monitor Association box will appear. Select **Disassociate**.

STEP 3: Verify the times are accurate, if not select **Modify** and change to the appropriate time for the disassociation.

- Verify the association time and **Modify** if needed.

STEP 4: Select **Apply**.

NOTE: If previous disassociation was missed or forgotten. Use this workflow to modify times to correct.

Surgery

Surgery Forms

- New forms are available with updated content and will replace existing forms:
 - **Perioperative Preadmission Assessment** replaces:
 - Surgery Preadmission History & Assessment
 - PreAdmission Visit Assessment Amb
 - Preadmission Assessment v1

- PreAdmission Assessment
- Preadmission Visit Assessment
- Preadmission Phone Assessment
- Endo Preadmission Assessment/Endo Preadmission Phone Assessment
- Visit History and Assessment ASC
- **Perioperative Preprocedure Intake** replaces:
 - Surgery Admission Assessment – Ambulatory Surgery
 - Surgery Admission Assessment – Comprehensive
 - Surgery Admission Assessment - Condensed
 - Surgery Admission – Pain/Local
- **Perioperative Preprocedure Checklist** replaces:
 - Preprocedure Checklist
 - Preprocedure Checklist – Condensed
 - Pediatric Preprocedure Checklist
 - Endo Preprocedure Checklist

Future Changes

To Be Determined

- Instead of using POC PowerForms, POC result values can be entered into the Point of Care Result Entry tool. Coming by end of year 2026.
- Reverse Interaction Checking will automatically run each time new allergies are entered and can be run at any time by clicking **Reverse Allergy Check** button.
 - **Interaction is found:** Red warning populates with details. This is not auto dismissed.
 - **No interaction is found:** Green checkmark with text **Success. No Drug Interaction found.** This message will auto-dismiss after five seconds.
- MyExperience Replacement
 - **MyExperience will be replaced with Role Profiles.** In the future, if more than one role exists there will be a prompt to choose a role when logging into an application.

For questions regarding process and/or policies, please contact your unit's Clinical Educator. For questions regarding workflow, please [place a ticket](#) to Health Informatics. For any other questions please contact the Customer Support Center at: 207-973-7728 or 1-888-827-7728.
