CommunityWorks Monthly Update

All Venues

Clinical Entry Workspace

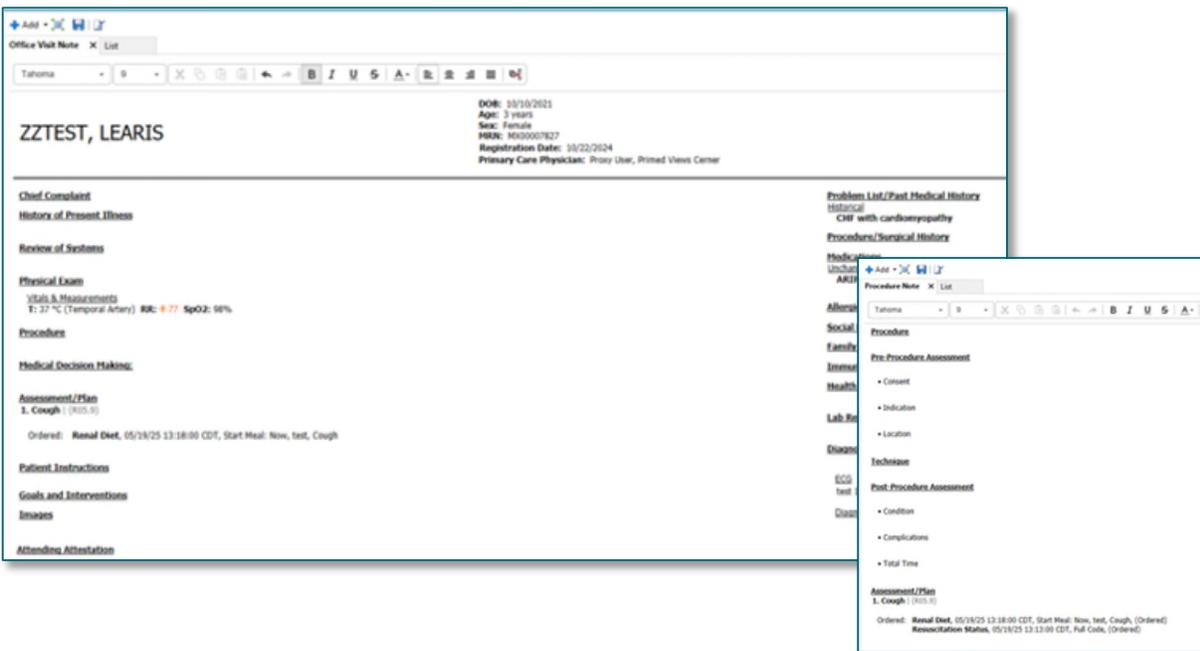

- **Physician Documentation within Clinical Entry Workspace** offer features such as **Last Documentation, Last Assessment and Plan, and Assessment and Plan Template Switching.**
- **These updates will streamline clinician documentation by enabling easy retrieval and reuse of relevant narrative text and assessments from previous encounters, and by allowing selection of dynamic documentation templates, to improve efficiency and consistency in clinical notes.**
- **Narrative text will pull from qualifying encounters within the past 18 months from notes that are in Authenticated or Modified status. Strike-through text does not pull forward.**
 - My Last Option pulls the last text you entered
 - Most Recent pulls the latest text entered by you or another user
- **If a clinician selects an option for Last Documentation and documentation already exists a warning model appears. The user must choose to:**
 - Append (add to) the existing documentation.
 - Replace the existing documentation.
- **Any text that pulls forward using the Last Documentation list is tagged and source information can be viewed by selecting the reference number after the tagged text. Source information for tagged text can be viewed by selecting the reference number after the tagged text. Source information includes Note title, Date, and Author. Reference marks automatically sequence in ascending order starting at 1 in the component when new tagged text is Inserted, Edited, or Removed.**
 - If edits are made, then the footnote will no longer be displayed.

Isolation and Latex Allergy Alerts

- Isolation and Latex Allergy Alerts will only fire once in a 12-hour period for each clinician to help prevent alert fatigue.

Dynamic Documentation

➤ Dynamic Documentation Updates

- FreeText Note – Image Section removed
- H&P – Added attending attestation for alignment, changed ECG display to EKG to align to Acute Mpage, Removed Implanted Devices, Removed Referral Orders
- Office Visit Note – Additional Information under Chief Complaint Removed, Medications and immunization this visit removed, Lab results EMR content aligned to Office Visit Note, Depression screening continues to pull in if documented under Physical Exam
- Medications changed to Med Rec Physician Facing to show how meds are managed
- Formatting changes in all templates – Family History, Social History, Med Rec Table, Problems, Procedures, Allergies, Categorized Meds, Assessment and Plan, Med Rec Physician
- Ambulatory Visit Instructions – formatting changes with reducing template size
- Consult Note – Changed ECG header to EKG that aligns to Acute Workflow and Attending Attestation Added
- Procedure Note – Formatting updated to latest content

CommunityWorks Monthly Update

Orthostatic Blood Pressure

- Orthostatic blood pressure documentation will be consistent across iView, PowerForms, to produce accurate information in dynamic documentation notes.

Physical Exam					
Vitals & Measurements					
T: 43	°C (Temporal Artery)	HR: 55	(Peripheral)	BP: 119/77	BP: 120/75(Repeat)
Orthostatic BP			Orthostatic HR		
Supine	120/77	07/08/2025 13:20 CDT	52	07/08/2025 13:20 CDT	
Sitting	110/70	07/07/2025 12:05 CDT	50	07/07/2025 12:05 CDT	
Standing	121/78	07/08/2025 13:20 CDT	55	07/08/2025 13:20 CDT	
Standing 3 Min	122/90	07/07/2025 09:52 CDT	56	07/07/2025 09:52 CDT	

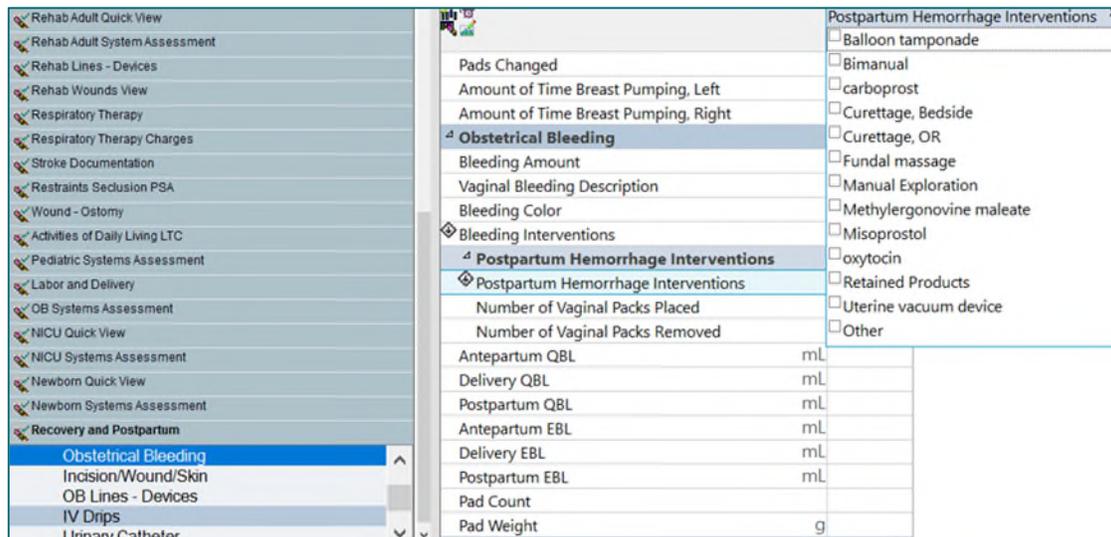

Nursing

Nursing Assistant

- Nursing Assistant and PCT Positions will no longer be able to chart in the MAR.

Women's Health

- Updates to Recovery & Postpartum and Obstetrical Bleeding sections in iView:
 - Uterine Balloon Tamponade Catheter, previously located in OB Lines and Devices, will migrate to become a conditional documentation element within the Postpartum Hemorrhage Interventions workflow.
 - Uterine Vacuum Device will also be an intervention listed under Postpartum Hemorrhage Interventions.

Surgery

Skin Assessment

- Skin Assessment segment updated with AORN recommendations.

The screenshot shows a 'Skin Assessment' form with the following fields and options:

- Skin assessment done prior to procedure:** Radio buttons for Yes, N/A, and No, Emergent or Trauma Case.
- Surgeon Notified:** Radio buttons for Yes and No.
- Skin Integrity:** Radio buttons for Intact and Not intact.
- Skin Abnormality:** Radio buttons for Yes and No.
- Abnormality Location:** A text input field.
- Abnormality Type:** A dropdown menu.
- Outcome Met (0.60):** Radio buttons for Yes and No.
- Color:** A color selection dropdown with '>>' and '<<' navigation buttons.
- Abnormality Comment:** A text area.
- Buttons:** 'Close' and 'Save Positions' buttons.

Future Changes

To Be Determined

- Instead of using POC PowerForms, POC result values can be entered into the Point of Care Result Entry tool.
- Pregnancy Cloud components will include workflows for add/close pregnancy, pregnancy overview, and pregnancy history components. These will replace the legacy Oracle Health Maternity MPage Components.

The screenshot shows the 'Pregnancy Overview' interface with the following data:

Gestational Information	EDD: 08/21/2023 (Authoritative)	Current Weight: 40 kg	Blood Type: A NEG
ZIG: Bw 3d		Pre-Preg Weight: 58 kg	Blood Type, External: A negative
Grovida/Parity: G1,P0(0,0,0,0)		Height: 165 cm	
Multiple Fetuses: No, Singleton		BMI: 22.04 kg/m ²	
Feeding Plan: --			

Add Pregnancy

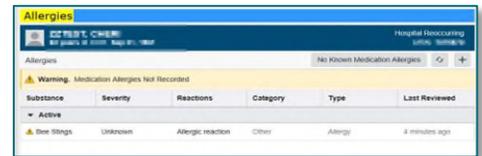

EDD Details

- EDD: Aug 21, 2023 (Authoritative)
- EGA: Bw 3d
- EGA at Date of Method: Bw 3d
- EDD Confirmation Method: Last Menstrual Period

Problem List

CommunityWorks Monthly Update

- In OT/PT/SLP forms, duplicate charges and charge sections will be removed. New 'Time Spent With Patient' sections for OT/PT/SLP acute, inpatient, outpatient, and long-term care PowerForms will replace those sections.
- Allergies will be updated with a new look and feel for a more user-friendly experience.
 - No changes to the MPage component at this time, the update will occur in patient's charts, forms, scheduling appointment book, PharmNet, and RadNet.
- Reverse Interaction Checking will automatically run each time new allergies are entered and can be run at any time by clicking Reverse Allergy Check button.
 - **Interaction is found:** Red warning populates with details. This is not auto dismissed.
 - **No interaction is found:** Green checkmark with text **Success. No Drug Interaction found.** This message will auto-dismiss after 5 seconds.
- MyExperience Replacement
 - MyExperience will be replaced with Role Profiles. In the future, if more than one role exists there will be a prompt to choose a role when logging into an application.

For questions regarding process and/or policies, please contact your unit's Clinical Educator. For questions regarding workflow, please [place a ticket](#) to Health Informatics. For any other questions please contact the Customer Support Center at: 207-973-7728 or 1-888-827-7728.
