## Future Changes

### To Be Determined

- Allergies will be updated with a new look and feel for a more user-friendly experience.
  - No changes to the MPage component at this time. The update will occur in patient's charts, forms, scheduling appointment book, Pharmnet, and Radnet.
- Reverse Interaction Checking will automatically run every time new allergies are entered and can be run at any time by clicking the Reverse Allergy Check button.
  - **Interaction is found:** Red warning populates with details. This is not auto dismissed.
  - **No interaction is found:** Green checkmark with text **Success. No Drug Interaction found.** The message will auto-dismiss after 5 seconds.
- MyExperience Replacement
  - **MyExperience will be replaced with Role Profiles.** In the future, if more than one role exists there will be a prompt to choose a role when logging into an application.
- Clinical Entry Workspace is a new functionality called Integrated Charting which provides workflow efficiencies.
  - Located on the right side of the MPages.
  - Providers and nurses will document components that feed their Dynamic Documentation Notes and the Patient Discharge Summary.
  - Provides an efficient method to search for and open PowerForms.
    - PowerForms can be saved as a favorite.
  - View PowerForm documentation.
