Pharmacy

Pharmacy Label Changes

- Pharmacy Label updated to better reflect the route of administration as well as pulling in the Brand Name from the product formulary that is assigned to the order.
 - Additionally, update to the Phone Number type listed on labels. The order number has been added to the dispense label.

Dosing Schedule Review

- When a scheduled medication dose is set too close to the next administration, the Review Schedule window will open.
- You may choose to skip the next dose or adjust the times, and no changes are required.
- The Review Schedule window is currently showing this information and does not pop up before signing.
- The change is only forcing a click of the Review button before signing an order.

Rehab

Speech Language Pathology

- Updates to Home Liquids and Home Diet Fields to align with the International Dysphagia Diet Standardization Initiative (IDDSI) language standards and Oracle Health speech therapy content recommendations.
- This change impacts the Pre-Assessment section used on SLP PowerForms.

Behavioral Health

Modified Overt Aggression Scale Deprecation

- The Modified Overt Aggression Scale will no longer be available in Behavioral Health content.
- This scale should be completed on paper and scanned into the chart.

Surgery

Counts

- Additional segments have been added to the Counts Verification in surgical and anesthesia PowerForms.

Anesthesia

Documentation Updates

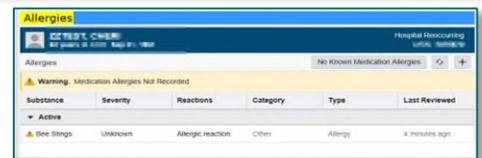

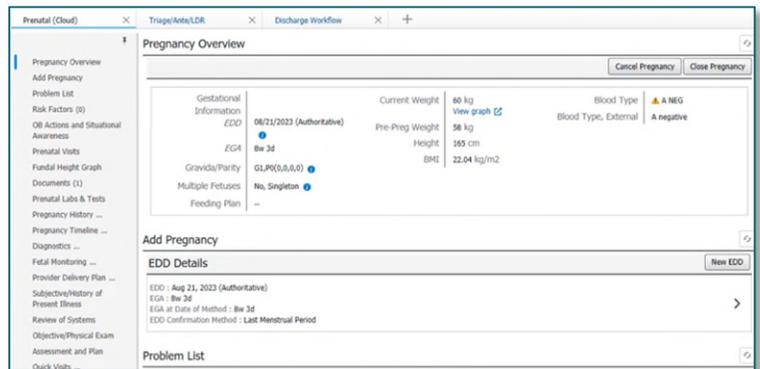

- Allows Anesthesiologists to document in Dynamic Documentation within their Perioperative workflow MPage.
- Smart Templates available:
 - ANES_Anesthesia Type - pulls from perioperative field
 - ANES_General Anes Risk Assessment - pulls from Anesthesia Assessment Section
 - ANES_Preop Diagnosis - pulls from perioperative field
 - ANES_Surgical Procedure - pulls procedure, start and stop time from perioperative fields
 - ANES_Procedure_Timeout/Assist Details - pulls procedure, start and stop times from Procedure_Timeout/Assist Details iView documentation
 - ANES_Malignant Hyperthermia Screening - pulls from Anesthesia Assessment Section

- Certain Dynamic Documentation sections will now populate from the Surgical Assessment including:
 - OSA Risk section
 - BiPap/CPAP Use at Night
 - Obstructive Sleep Apnea Dx
 - Symptoms of Sleep Apnea
 - PONV Risk
 - PONV Risk Score

- Anesthesia History
 - Anesthesia History
 - Anesthesia Reaction
 - Date of Anesthesia Reaction

Future Changes

To Be Determined

- Instead of using POC PowerForms, POC result values can be entered into the Point of Care Result Entry tool.
- Pregnancy Cloud components will include workflows for add/close pregnancy, pregnancy overview, and pregnancy history components. These will replace the legacy Oracle Health Maternity MPage Components.
- Allergies will be updated with a new look and feel for a more user-friendly experience.
 - No changes to the MPage component at this time, the update will occur in patient's charts, forms, scheduling appointment book, PharmNet, and RadNet.
- Reverse Interaction Checking will automatically run each time new allergies are entered and can be run at any time by clicking Reverse Allergy Check button.
 - **Interaction is found:** Red warning populates with details. This is not auto dismissed.
 - **No interaction is found:** Green checkmark with text **Success. No Drug Interaction found.** This message will auto-dismiss after 5 seconds.
- MyExperience Replacement
 - **MyExperience will be replaced with Role Profiles.** In the future, if more than one role exists there will be a prompt to choose a role when logging into an application.
