

KNOWN ISSUE – Fatal Warning on Discharge Assessment

WHO: The change will affect the following staff, who are Bcc'd on this e-mail:

- Discharging Clinicians

WHAT: When signing/validating a **discharge OASIS assessment on the mobile tablet**, you may see a **“Fatal Error” warning** related to **M2420 – Discharge Disposition**.

What This Means

- This warning **only appears on the mobile tablet**.
- The same assessment **does not show the error on the host system**.
- The assessment **does sync successfully** despite the message.
- **No data is lost**, and the discharge is properly received.

What You Should Do

- **Continue completing and syncing the discharge OASIS as usual.**
- If the warning appears, you may proceed, **no additional actions required.**

WHY: This is a **system issue with the mobile application**, not a problem with your documentation.

****PLEASE NOTE: This mailbox is not monitored.****
