---

## EHR Updates

Week of April 2 – April 8, 2026

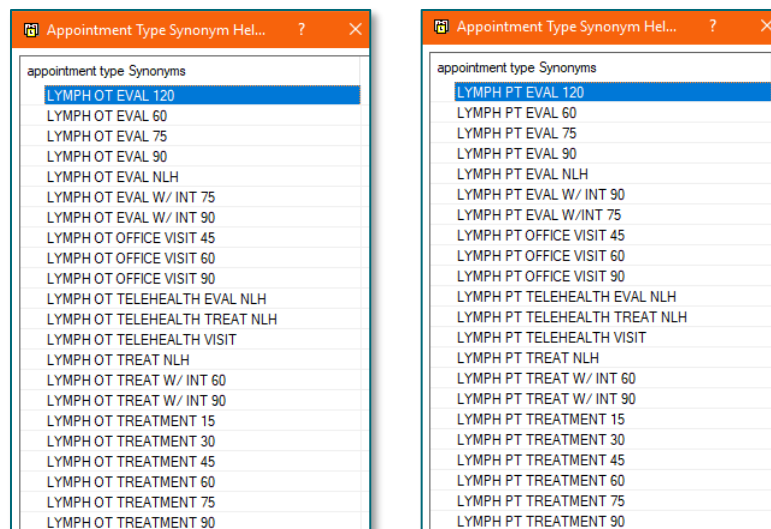

Page 4 of 42

---

### Ambulatory Front Office Staff – Rehab Only

## Lymphedema Documentation and Workflow Optimization – Lymphedema OT and PT

**WHAT:** Lymphedema patients will display on the **Multi-Patient Task List (MPTL)** when checked in on arrival. **Lymphedema PowerForm** documentation has been updated.

Documentation tasks will also be displayed in the Activities column of the **Rehabilitation Organizer** for Lymphedema patients.

### New Lymphedema Appointment Types

- **Lymphedema appointment types** have been updated with **new OT and PT Lymphedema Orders**. **Lymph OT** and **Lymph PT** precede the appointment type to be scheduled.
  - Scheduling staff should select the Lymph appointment type for the discipline that will be seeing the patient.

**NOTE:** Existing lymphedema patients with appointments scheduled into the future will **automatically convert to Lymph OT appointments**. If the patient is to be seen by a Physical Therapist, the appointment should be cancelled and rescheduled with a Lymph PT appointment type.

---

## Documentation Updates

- Lymphedema documentation occurs in four sections instead of seven.
  - **Lymphedema History**
    - Lymphedema History
    - Surgical History
    - Prior Lymphedema Treatment
  - **Lymphedema Skin Assessment**
  - **Lymphedema Treatment**
    - Compression Garments
    - Compression Pump
    - Self-Lymphatic Drainage
    - Axillary Web Syndrome
  - **Lymphedema Measurements**
- **Physical Therapy orders** will only display in the **General Information** section of the **PT Lymphedema Daily Documentation PowerForm**.
- **Education** section has the **Home Program/Education** free text box added to allow for documentation of home care or exercise instructions.

|                            |

| Lymphedema History         |
| Lymphedema Skin Assessment |
| Lymphedema Treatment       |
| Lymphedema Measurements    |

Click [here](#) for full Lymphedema Workflow education.

## WHY: New Lymphedema Appointment Types

New appointment types automatically place Lymphedema patients in the MPTL and Rehabilitation Organizer at check-in, improving workflow by:

- Therapists no longer need to manually search for the correct encounter and select the documentation form for the patient thus reducing the episodes of charting on an incorrect encounter.
- Reduces clicks and supports a more consistent workflow.
- Consistent triggering of Lymphedema workflows supports safer care.

## Documentation Updates

Reducing the number of documentation sections streamlines the overall structure, making it easier to maintain and navigate. Consolidating related content into a single section improves efficiency by helping users find information more quickly.

---

## EHR Updates

### Week of April 2 – April 8, 2026

Page 6 of 42

---

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Ambulatory

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo and Acadia)

**WHO:** The change will affect the following staff at the above noted locations:

- Occupational Therapists and Assistants
- Physical Therapists and Assistants
- Rehab PSRs
- Therapy Managers

---

## Ambulatory Managers

### Ambulatory Manager: Clinical Charge Entry View-Only

**WHAT:** A new Viewpoint will be available to **Ambulatory Managers**, providing view-only access to the **Clinical Charge Entry** component for reviewing inpatient provider charges.

#### Clinical Charge Entry Component Access

To view, managers will click **+** within their workflow MPage, then add the **AMB Manager Clinical Charge Entry Reconciliation (View only)**.

**WHY:** Access to the Clinical Charge Entry component will provide managers with an additional tool to cross-reference charge reconciliation for inpatient providers.

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Ambulatory

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo and Acadia)

**WHO:** The change will affect the following staff at the above noted locations:

- Ambulatory Managers
-

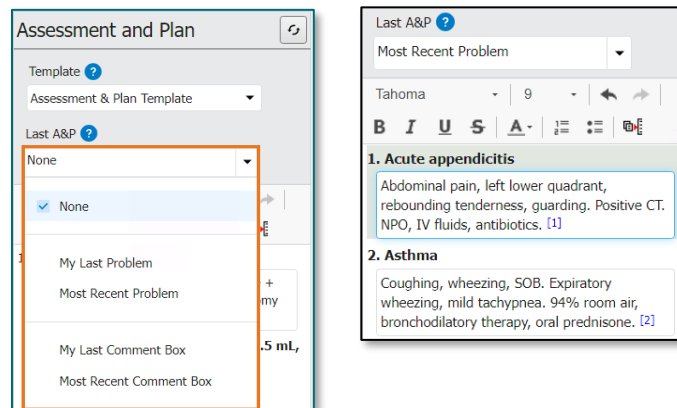

## Behavioral Health Staff

### All Ambulatory & Inpatient Care Areas

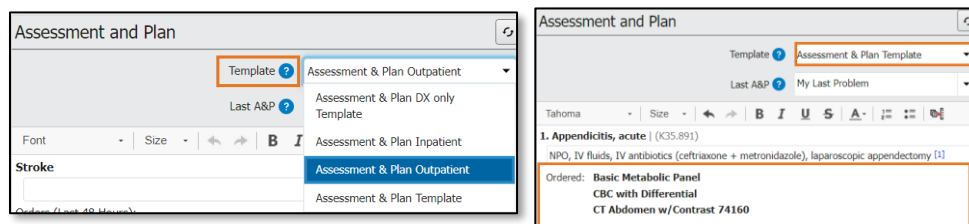

## Last Assessment & Plan (A&P) and Template Switching

**WHAT:** **Last A&P** allows providers to carry forward previously documented Assessment and Plan text located in the Workflow MPage when the same diagnosis from a prior encounter is selected.

**NOTE:** The diagnosis must be the same, including ICD10 code, and documented before free text narrative can be copied forward.

**Assessment & Plan Template** refers to using designated templates that automatically pull in orders associated with the selected diagnosis for up to 48 hours.

**NOTE:** Assessment & Plan Template selections are remembered once a template is selected.

Please click [here](#) for more information.

## EHR Updates

### Week of April 2 – April 8, 2026

**WHY:** This change reduces repetitive typing for chronic conditions by carrying forward prior assessments and plans, ensuring consistent messaging and clearer context across encounters.

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient (to include ED & Peri-Op)
- Ambulatory

At the following NLH Member Organization(s):

- All NLH Hospitals (excluding Mayo)

**WHO:** The change will affect the following staff at the above noted locations:

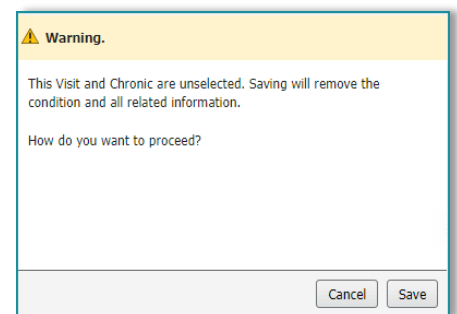

- Clinicians who document within the Assessment & Plan Workflow MPage, as clinically appropriate.
- NP/PA
- Physicians

### UPDATE: Problem List

**WHAT:** A **Warning** box will display when **This Visit** is unchecked and **Chronic** is not selected.

#### Available Actions

- **Save** will permanently remove the diagnosis and ALL related information.
  - Once saved, there will be no record of this problem saved in the system.
- **Cancel** will take you back into the Problem List without making any changes.

**WHY:** Oracle Cerner had communicated a Problem List patient care issue indicating that if the **This Visit** box is unchecked within the Problem List MPage component, and the **Chronic** box is not checked, the problem will be dropped and there will be no record of this problem saved in the system. This Warning will prompt staff to take an action, so documentation is not lost.

**WHEN:** Wednesday, April 1, 2026

---

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient
- Ambulatory/WIC

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo)

**WHO:** The change will affect the following staff at the above noted locations:

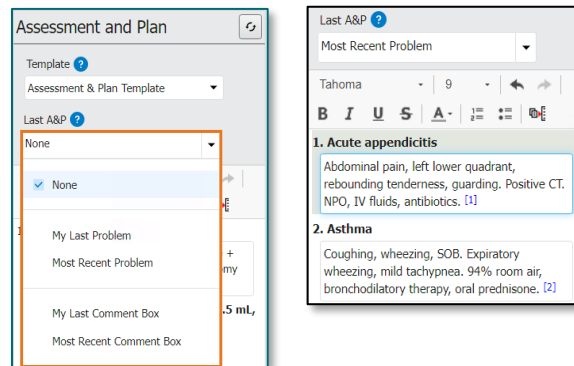

- Clinical Staff
- Providers

## Integrated Behavioral Health Only

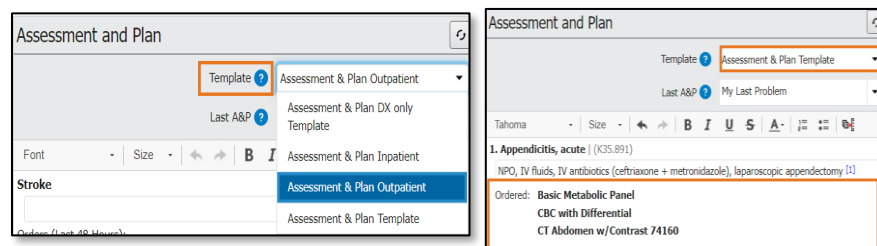

## Last Assessment & Plan (A&P) and Template Switching

**WHAT:** Last A&P allows providers to carry forward previously documented Assessment and Plan text located in the Workflow MPage when the same diagnosis from a prior encounter is selected.

**NOTE:** The diagnosis must be the same, including ICD10 code, and documented before free text narrative can be copied forward.

**Assessment & Plan Template** refers to using designated templates that automatically pull in orders associated with the selected diagnosis for up to 48 hours.

## EHR Updates

**WHY:** This update will ensure tests are booked correctly and patients receive proper prep, reducing rescheduling and preventing missed procedural slots.

**WHEN:** Effective Immediately

**WHERE:** The change will affect the following venue(s):

- Ambulatory

**At the following NLH Member Organization(s):**

- Blue Hill and Maine Coast ONLY

**WHO:** The change will affect the following staff at the above noted locations:

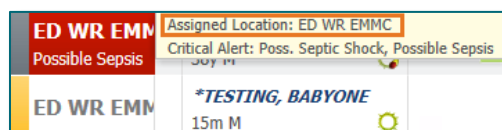

- Clinical Staff
- Providers

### Tracking Board Location Name Updates

**WHAT:** On **Tuesday, April 7**, the **tracking board locations** for the **Emergency Department, Walk-In Care, Infusion and Oncology** locations will be renamed. These changes are **naming updates only**, and do not reflect workflow or location changes. **Facility names have been added to the end of the location names for clarity.**

### Tracking Location Name Update Examples

- Emergency Departments will view organization name after certain room locations.

- Infusion Clinics will view organization name after waiting room location names.

|                     |                   |
|---------------------|-------------------|
| INF WR Level 2 EMMC | TESTING, WAYLON   |
| INF WR Level 2 EMMC | TESTING, ONCADULT |

- Walk-In Clinics will view organizational names after waiting room locations.

|               |                 |
|---------------|-----------------|
| WIC WR PI ARG | TESTING, EUVWIC |
|---------------|-----------------|

**WHY:** This change supports accurate location selection at patient check-in. Currently, if an inaccurate tracking location is selected, the encounters facility and nurse unit are updated to that location. As a result, all related clinical documentation is attributed to the incorrect location.

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Ambulatory/Walk-In Care
- ED

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo and Acadia)

**WHO:** The change will affect the following staff at the above noted locations:

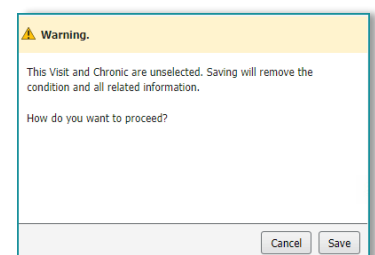

- Ambulatory Clinical Staff
- Front Office Staff
- Nursing
- Providers
- Schedulers

## UPDATE: Problem List

**WHAT:** A **Warning** box will display when **This Visit** is unchecked and **Chronic** is not selected.

### Available Actions

- **Save** will permanently remove the diagnosis and ALL related information.
  - Once saved, there will be no record of this problem saved in the system.

## EHR Updates

Week of April 2 – April 8, 2026

Page 16 of 42

---

- **Cancel** will take you back into the Problem List without making any changes.

**WHY:** Oracle Cerner had communicated a Problem List patient care issue indicating that if the **This Visit** box is unchecked within the Problem List MPage component, and the **Chronic** box is not checked, the problem will be dropped and there will be no record of this problem saved in the system. This Warning will prompt staff to take an action, so documentation is not lost.

**WHEN:** Wednesday, April 1, 2026

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient
- Ambulatory/WIC

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo)

**WHO:** The change will affect the following staff at the above noted locations:

- Clinical Staff
- Providers

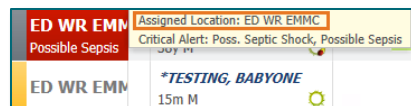

### Emergency

### Tracking Board Location Name Updates

**WHAT:** On Tuesday, April 7, the tracking board locations for the **Emergency Department, Walk-In Care, Infusion** and **Oncology** locations will be renamed. These changes are **naming updates only**, and do not reflect workflow or location changes. **Facility names have been added to the end of the location names for clarity.**

#### Tracking Location Name Update Examples

- Emergency Departments will view organization name after certain room locations.

- Infusion Clinics will view organization name after waiting room location names.

**WHO:** The change will affect the following staff at the above noted locations:

- Clinical Staff
- Providers

---

## Patient Service Representatives

### Ambulatory/WIC Only

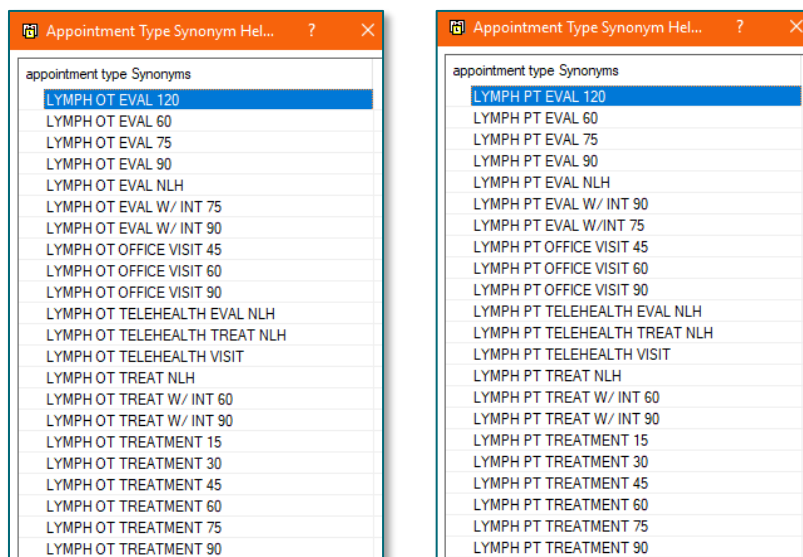

## Lymphedema Documentation and Workflow Optimization – Therapy PSRs only

**WHAT:** Lymphedema patients will display on the **Multi-Patient Task List (MPTL)** when checked in on arrival. **Lymphedema PowerForm** documentation has been updated.

Documentation tasks will also be displayed in the Activities column of the **Rehabilitation Organizer** for Lymphedema patients.

### New Lymphedema Appointment Types

- **Lymphedema appointment types** have been updated with **new OT and PT Lymphedema Orders**. **Lymph OT** and **Lymph PT** precede the appointment type to be scheduled.
  - Scheduling staff should select the Lymph appointment type for the discipline that will be seeing the patient.

**NOTE:** Existing lymphedema patients with appointments scheduled into the future will **automatically convert to Lymph OT appointments**. If the patient is to be seen by a Physical Therapist, the appointment should be cancelled and rescheduled with a Lymph PT appointment type.

### Documentation Updates

- Lymphedema documentation occurs in four sections instead of seven.
  - **Lymphedema History**
    - Lymphedema History
    - Surgical History
    - Prior Lymphedema Treatment
  - **Lymphedema Skin Assessment**
  - **Lymphedema Treatment**
    - Compression Garments
    - Compression Pump
    - Self-Lymphatic Drainage
    - Axillary Web Syndrome
  - **Lymphedema Measurements**
- **Physical Therapy orders** will only display in the **General Information** section of the **PT Lymphedema Daily Documentation PowerForm**.
- **Education** section has the **Home Program/Education** free text box added to allow for documentation of home care or exercise instructions.

|                            |
|----------------------------|
| Lymphedema History         |
| Lymphedema Skin Assessment |
| Lymphedema Treatment       |
| Lymphedema Measurements    |

Click [here](#) for full Lymphedema Workflow education.

### **WHY:** New Lymphedema Appointment Types

New appointment types automatically place Lymphedema patients in the MPTL and Rehabilitation Organizer at check-in, improving workflow by:

- Therapists no longer need to manually search for the correct encounter and select the documentation form for the patient thus reducing the episodes of charting on an incorrect encounter.
  - Reduces clicks and supports a more consistent workflow.
  - Consistent triggering of Lymphedema workflows supports safer care.
-

## EHR Updates

### Week of April 2 – April 8, 2026

#### Documentation Updates

Reducing the number of documentation sections streamlines the overall structure, making it easier to maintain and navigate. Consolidating related content into a single section improves efficiency by helping users find information more quickly.

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Ambulatory

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo and Acadia)

**WHO:** The change will affect the following staff at the above noted locations:

- Occupational Therapists and Assistants
- Physical Therapists and Assistants
- Rehab PSRs
- Therapy Managers

#### Tracking Board Location Name Updates

**WHAT:** On Tuesday, April 7, the tracking board locations for the **Emergency Department, Walk-In Care, Infusion and Oncology** locations will be renamed. These changes are **naming updates only**, and do not reflect workflow or location changes. **Facility names have been added to the end of the location names for clarity.**

#### Tracking Location Name Update Examples

- Emergency Departments will view organization name after certain room locations.

|                 |                                                     |
|-----------------|-----------------------------------------------------|
| ED WR EMM       | Assigned Location: ED WR EMMC                       |
| Possible Sepsis | Critical Alert: Poss. Septic Shock, Possible Sepsis |
| ED WR EMM       | *TESTING, BABYONE                                   |

- Providers
- Schedulers

---

## Pharmacists & Pharmacy Technicians

Ambulatory/WIC/Inpatient/ED/Peri-Op

## Last Assessment & Plan (A&P) and Template Switching

**WHAT:** **Last A&P** allows providers to carry forward previously documented Assessment and Plan text located in the Workflow MPage when the same diagnosis from a prior encounter is selected.

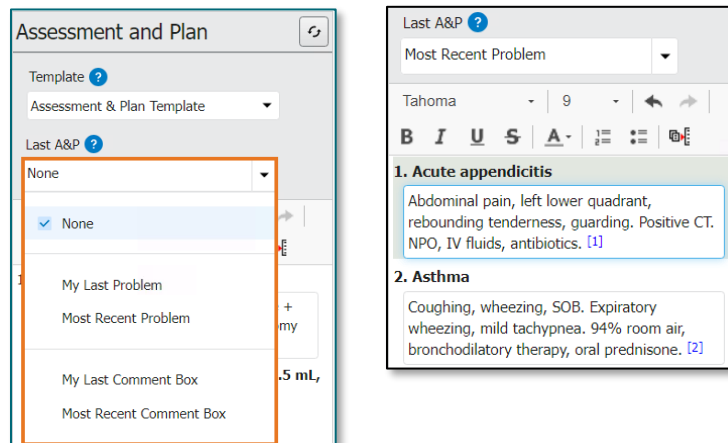

---

## EHR Updates

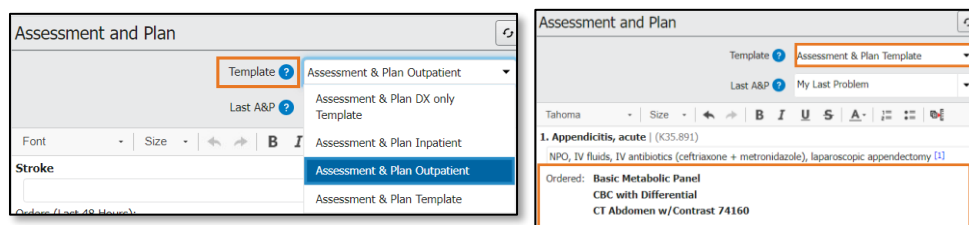

Week of April 2 – April 8, 2026

Page 24 of 42

**NOTE:** The diagnosis must be the same, including ICD10 code, and documented before free text narrative can be copied forward.

**Assessment & Plan Template** refers to using designated templates that automatically pull in orders associated with the selected diagnosis for up to 48 hours.

**NOTE:** Assessment & Plan Template selections are remembered once a template is selected.

Please click [here](#) for more information.

**WHY:** This change reduces repetitive typing for chronic conditions by carrying forward prior assessments and plans, ensuring consistent messaging and clearer context across encounters.

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient (to include ED & Peri-Op)
- Ambulatory

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo)

**WHO:** The change will affect the following staff at the above noted locations:

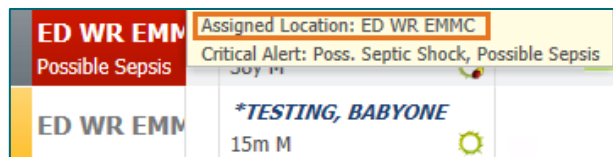

- Clinicians who document within the Assessment & Plan Workflow MPage, as clinically appropriate.
- NP/PA
- Physicians

## Tracking Board Location Name Updates

## Tracking Board Location Name Updates

**WHAT:** On Tuesday, April 7, the tracking board locations for the **Emergency Department, Walk-In Care, Infusion and Oncology** locations will be renamed. These changes are **naming updates only**, and do not reflect workflow or location changes. **Facility names have been added to the end of the location names for clarity.**

---

### Tracking Location Name Update Examples

- Emergency Departments will view organization name after certain room locations.

- Infusion Clinics will view organization name after waiting room location names.

|                     |                   |
|---------------------|-------------------|
| INF WR Level 2 EMMC | TESTING, WAYLON   |
| INF WR Level 2 EMMC | TESTING, ONCADULT |

- Walk-In Clinics will view organizational names after waiting room locations.

|               |                 |
|---------------|-----------------|
| WIC WR PI ARG | TESTING, EUVWIC |
|---------------|-----------------|

**WHY:** This change supports accurate location selection at patient check-in. Currently, if an inaccurate tracking location is selected, the encounters facility and nurse unit are updated to that location. As a result, all related clinical documentation is attributed to the incorrect location.

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Ambulatory/Walk-In Care
- ED

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo and Acadia)

**WHO:** The change will affect the following staff at the above noted locations:

- Ambulatory Clinical Staff
  - Front Office Staff
  - Nursing
  - Providers
  - Schedulers
-

## EHR Updates

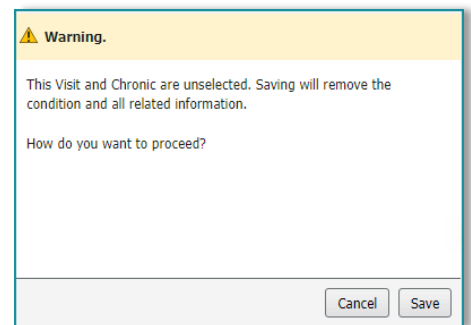

### Week of April 2 – April 8, 2026

#### UPDATE: Problem List

**WHAT:** A **Warning** box will display when **This Visit** is unchecked and **Chronic** is not selected.

##### Available Actions

- **Save** will permanently remove the diagnosis and ALL related information.
  - Once saved, there will be no record of this problem saved in the system.
- **Cancel** will take you back into the Problem List without making any changes.

**WHY:** Oracle Cerner had communicated a Problem List patient care issue indicating that if the **This Visit** box is unchecked within the Problem List MPage component, and the **Chronic** box is not checked, the problem will be dropped and there will be no record of this problem saved in the system. This Warning will prompt staff to take an action, so documentation is not lost.

**WHEN:** Wednesday, April 1, 2026

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient
- Ambulatory/WIC

At the following NLH Member Organization(s):

- All NLH Hospitals (excluding Mayo)

**WHO:** The change will affect the following staff at the above noted locations:

- Clinical Staff
- Providers

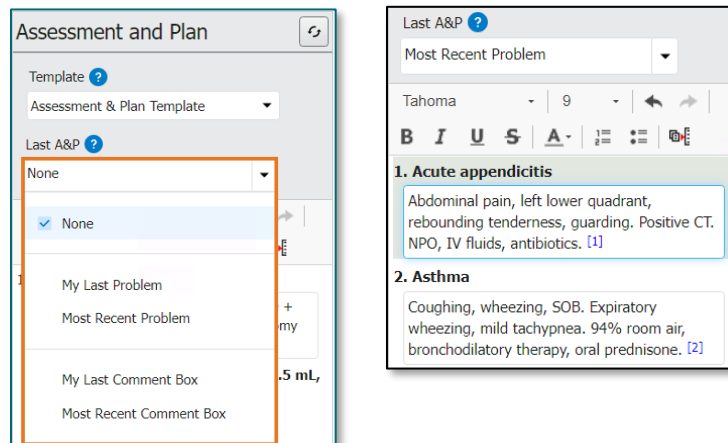

Inpatient

#### Last Assessment & Plan (A&P) and Template Switching

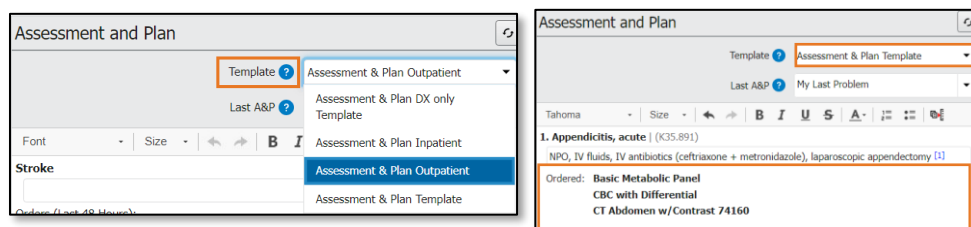

**WHAT:** **Last A&P** allows providers to carry forward previously documented Assessment and Plan text located in the Workflow MPage when the same diagnosis from a prior encounter is selected.

---

**NOTE:** The diagnosis must be the same, including ICD10 code, and documented before free text narrative can be copied forward.

**Assessment & Plan Template** refers to using designated templates that automatically pull in orders associated with the selected diagnosis for up to 48 hours.

**NOTE:** Assessment & Plan Template selections are remembered once a template is selected.

Please click [here](#) for more information.

**WHY:** This change reduces repetitive typing for chronic conditions by carrying forward prior assessments and plans, ensuring consistent messaging and clearer context across encounters.

**WHEN:** Tuesday, April 7, 2026

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient (to include ED & Peri-Op)
- Ambulatory

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Mayo)

## EHR Updates

### Week of April 2 – April 8, 2026

**WHO:** The change will affect the following staff at the above noted locations:

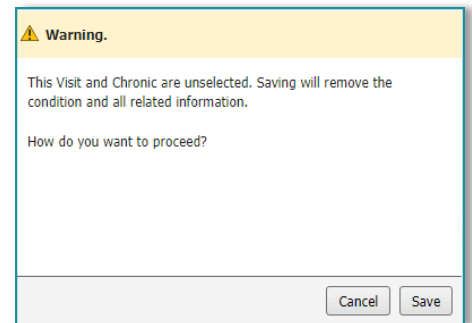

- Clinicians who document within the Assessment & Plan Workflow MPage, as clinically appropriate.
- NP/PA
- Physicians

**WHO:** The change will affect the following staff at the above noted locations:

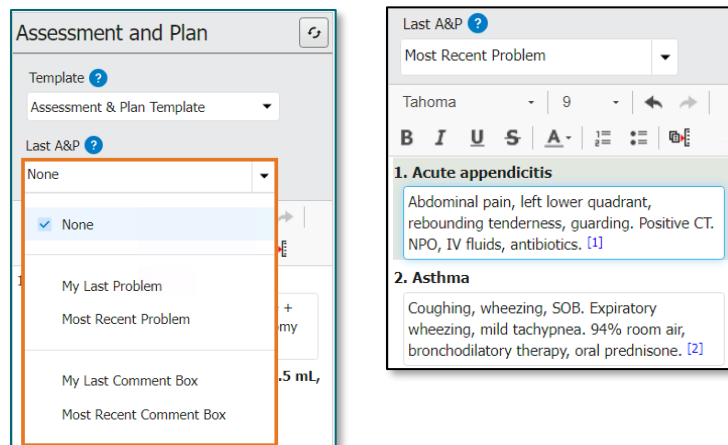

- Clinical Staff
- Providers

### Ambulatory Only

## Lymphedema Documentation and Workflow Optimization – Lymphedema OT and PT

**WHAT:** Lymphedema patients will display on the **Multi-Patient Task List (MPTL)** when checked in on arrival. **Lymphedema PowerForm** documentation has been updated.

Documentation tasks will also be displayed in the Activities column of the **Rehabilitation Organizer** for Lymphedema patients.

### New Lymphedema Appointment Types

- **Lymphedema appointment types** have been updated with **new OT and PT Lymphedema Orders**. **Lymph OT** and **Lymph PT** precede the appointment type to be scheduled.
  - Scheduling staff should select the Lymph appointment type for the discipline that will be seeing the patient.

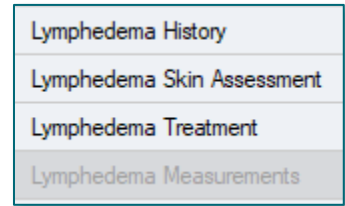

**NOTE:** Existing lymphedema patients with appointments scheduled into the future will **automatically convert to Lymph OT appointments**. If the

---

patient is to be seen by a Physical Therapist, the appointment should be cancelled and rescheduled with a Lymph PT appointment type.

### Documentation Updates

- Lymphedema documentation occurs in four sections instead of seven.
  - **Lymphedema History**
    - Lymphedema History
    - Surgical History
    - Prior Lymphedema Treatment
  - **Lymphedema Skin Assessment**
  - **Lymphedema Treatment**
    - Compression Garments
    - Compression Pump
    - Self-Lymphatic Drainage
    - Axillary Web Syndrome
  - **Lymphedema Measurements**
- **Physical Therapy orders** will only display in the **General Information** section of the **PT Lymphedema Daily Documentation PowerForm**.
- **Education** section has the **Home Program/Education** free text box added to allow for documentation of home care or exercise instructions.

|                            |
|----------------------------|
| Lymphedema History         |
| Lymphedema Skin Assessment |
| Lymphedema Treatment       |
| Lymphedema Measurements    |

Click [here](#) for full Lymphedema Workflow education.

### WHY: New Lymphedema Appointment Types

New appointment types automatically place Lymphedema patients in the MPTL and Rehabilitation Organizer at check-in, improving workflow by:

- Therapists no longer need to manually search for the correct encounter and select the documentation form for the patient thus reducing the episodes of charting on an incorrect encounter.
- Reduces clicks and supports a more consistent workflow.
- Consistent triggering of Lymphedema workflows supports safer care.

### Documentation Updates

Reducing the number of documentation sections streamlines the overall structure, making it easier to maintain and navigate. Consolidating related
