EHR Updates

Week of June 11 – June 17, 2026

Behavioral Health Staff

Ambulatory Only

Label Comment within Microbiology Lab Orders

WHAT: Microbiology orders will have the **Special Instructions** field removed. All necessary comments should be entered into the **Label Comments** field. This change ensures comments print directly on specimen labels and are visible to the lab.

The screenshot shows a web-based form titled "Details for Bordetella pertussis PCR (PCR Bordetella pertussis)". The form has tabs for "Details", "Order Comments", and "Diagnoses". The "Details" tab is active. The form contains several fields: "Specimen Type" (NASOPHARYNX), "Start Date/Time" (05/26/2026 13:28 EDT), "Clinical Indication" (a dropdown menu), "Collection Priority" (Routine), "Frequency" (ONCE), "Duration" (a text field), "Nurse Collect" (radio buttons for Yes and No), "Label Comment" (a text field with an orange border), "Collected By" (a text field with a search icon), "Free Text Source" (a text field), "Authorization #" (a text field), "Consulting Physician" (a text field with a search icon), and "Performing Location (ARLN)" (a dropdown menu).

WHY: Comments in Special Instructions are not visible to the lab, increasing the risk of missed or incomplete information. Moving comments to Label Comments ensures critical details are printed directly on the specimen label, improving visibility, communication, and patient safety.

WHEN: Tuesday, June 16, 2026

WHERE: The change will affect the following venue(s):

- Acute/Inpatient
- Ambulatory/WIC
- ED
- Peri-Op

At the following NLH Member Organization(s):

- All NLH Hospitals (excluding Mayo)

WHO: The change will affect the following staff at the above noted locations:

- Lab
 - Nursing
 - Pharmacists
 - Providers
-

Inpatient Only

Clairvia Update: Leave of Absence Tasks will be Consolidated into One

WHAT: All **Leave of Absence** tasks will be consolidated into a single generic **Leave of Absence** task within the **Clairvia Schedule Editor** due to changes in API and the vendor managing those absences. All locations will have a Non-Prod task just stating LEAVE except EMMC, the task will state LEAVE EMMC.

5 Ar_Non Prod LEAVE

5 E Non Prod LEAVE-EMMC

WHY: The change is being made to align with updated API functionality and the vendor's current management of leave-of-absence. Consolidating these into one generic task will simplify maintenance, improve consistency in task handling, and reduce complexity for end users by providing a more streamlined and standardized process.

WHEN: Monday, June 15, 2026

WHERE: The change will affect the following venue(s):

- Acute/Inpatient (to include ED & Peri-Op)

At the following NLH Member Organization(s):

- All NLH Hospitals using Clairvia Scheduling

WHO: The change will affect the following staff at the above noted locations:

- Clairvia Schedulers
 - Nurse Managers
-

MCH Bedside Procedure Charge iView Update

WHAT: BP CHARGE PICC Line Replacement has been added to the **MCH Bedside Procedure Charges** section located in **Adult, Adult Crit Care, and Periop Lines Devices Procedures** iView bands.

- Documentation of **Yes** will drop the charge for the PICC line replacement.

MCH Bedside Procedure Charges
BP CHARGE Amnioinfusion
BP CHARGE Bladder Cath Insertion, Comple
BP CHARGE Bladder Cath Insertion, Simple
BP CHARGE Bladder Cath Insertion, Straig
BP CHARGE Bladder Cath Urine Collection
BP CHARGE Bladder Irrigation 51700
BP CHARGE Bladder Voiding Scan
BP CHARGE Blood Transfusion
BP CHARGE Change/Reposition Feeding Tube
BP CHARGE Hypothermia Protocol
BP CHARGE Midline Placement
BP CHARGE PICC Line Replacement
BP CHARGE NPWT using DME < /= 50cm
BP CHARGE NPWT using DME < /= 50cm
BP CHARGE NPWT w/out DME < /= 50cm
BP CHARGE NPWT w/out DME < /= 50cm
BP CHARGE Therapeutic Phlebotomy
BP CHARGE UA/UV Line Placement
BP CHARGE Urina Boot Uni and Bil
PICC Line Placement < 5 yrs old w/o Imagi
PICC Line Placement > 5 yrs old w/o Imagi
BP CHARGE Measurement Post-Void Urine

WHY: The addition of the **BP CHARGE PICC Line Replacement** supports appropriate revenue capture for services rendered when a PICC line replacement is performed.

WHEN: Effective Immediately

WHERE: The change will affect the following venue(s):

- Acute/Inpatient (to include Peri-Op)

At the following NLH Member Organization(s):

- Maine Coast Hospital

WHO: The change will affect the following staff at the above noted locations:

- Imaging Nurses
- Nurses

Lab

Label Comment within Microbiology Lab Orders

WHAT: Microbiology orders will have the **Special Instructions** field removed. All necessary comments should be entered into the **Label Comments** field. This change ensures comments print directly on specimen labels and are visible to the lab.

The screenshot shows a web-based form for a 'Bordetella pertussis PCR (PCR Bordetella pertussis)' order. The form has tabs for 'Details', 'Order Comments', and 'Diagnoses'. The 'Details' tab is active. Fields include: 'Specimen Type' (NASOPHARYNX), 'Start Date/Time' (05/26/2026 1328 EDT), 'Collection Priority' (Routine), 'Frequency' (ONCE), 'Clinical Indication' (yellow highlight), 'Duration Unit', 'Collected By', 'Free Text Source', 'Authorization #', 'Nurse Collect' (Yes/No radio buttons), 'Label Comment' (highlighted with an orange border), 'Consulting Physician', and 'Performing Location (ARLN)'.

WHY: Comments in Special Instructions are not visible to the lab, increasing the risk of missed or incomplete information. Moving comments to Label Comments ensures critical details are printed directly on the specimen label, improving visibility, communication, and patient safety.

EHR Updates

Week of June 11 – June 17, 2026

Emergency

Label Comment within Microbiology Lab Orders

WHAT: Microbiology orders will have the **Special Instructions** field removed. All necessary comments should be entered into the **Label Comments** field. This change ensures comments print directly on specimen labels and are visible to the lab.

The screenshot shows the 'Details for Bordetella pertussis PCR (PCR Bordetella pertussis)' form. The 'Label Comment' field is highlighted with an orange box. The form includes various fields for specimen type, start date/time, clinical indication, collection priority, frequency, duration, nurse collect, consulting physician, and performing location.

WHY: Comments in Special Instructions are not visible to the lab, increasing the risk of missed or incomplete information. Moving comments to Label Comments ensures critical details are printed directly on the specimen label, improving visibility, communication, and patient safety.

WHEN: Tuesday, June 16, 2026

WHERE: The change will affect the following venue(s):

WHO: The change will affect the following staff at the above noted locations:

- Lab
 - Nursing
 - Pharmacists
 - Providers
-

Omnicell Technology Conversion – SVH Only (Go-Live June 22 – July 1)

WHAT: Northern Light Health is moving from its existing BD Pyxis system to the modern **Omnicell** platform. The transition will introduce automated dispensing cabinets, anesthesia workstations, central pharmacy dispensing solutions, and **Anywhere RN**, which enables remote medication queuing for Omnicell dispensing within **PowerChart** and **FirstNet**.

NOTE: For more information about **Oracle Cerner Omnicell Anywhere RN**, click [here](#). Additional training materials and resources are available on the Omnicell Training [website](#), and education for this transition will be provided through [HealthStream](#).

WHY: The transition standardizes and modernizes medication management technology across Northern Light Health to support a smoother, more efficient process for managing medications in daily patient care and pharmacy settings.

WHEN: Monday, June 22, 2026 – Monday, July 6, 2026

WHERE: The change will affect the following venue(s):

- Acute/Inpatient
- ED
- Peri-Op

At the following NLH Member Organization(s):

- SVH

WHO: The change will affect the following staff at the above noted locations starting on noted dates:

- **Clinical Staff and Pharmacy:** Omnicell XT Automated Dispensing Cabinets (*Go-Live: June 22*)
 - **Pharmacy:** Omnicell Controlled Substance Manager (*Go-Live: June 29*)
 - **Anesthesia and Pharmacy:** Omnicell XT Anesthesia Workstation (*Go-Live: July 6*)
-

Multi-Patient Task List Update: Ostomy-Wound Intervention – Blue Hill & Mercy

WHAT: Wound Care Nurse Practitioners will now be able to access the **Ostomy-Wound Intervention** tab to view wound consults on the **Multi-Patient Task List (Inpt)**.

Ostomy-Wound Intervention

- Patients with an **INP Ostomy-Wound Consult** will populate to the **Ostomy-Wound Intervention** tab within the **Multi-Patient Task List (Inpt)**

SBLA, Assigned Tasks

Transitionist Consult

Ostomy-Wound Intervention

Ostomy Pressure Inj Eval

Task retrieval completed

☒ All Patients

☒ *TESTING, ASHLEY

☒ *TESTING, INTUNE

☒ *TESTING, KENNEDY

☒ *TESTING, OPIE

	Location/Room/Bed	Name	Task Status	Mnemonic	Order Details
	SBLA / B583 / 01	*TESTING, ASHLEY 02/04/1985	Pending	INP Ostomy-Wound Consult	Start: 05/27/26 14:54:00 EDT, arm consult
		*Name Alert			
	SBLA / B580 / 01	*TESTING, INTUNE	Pending	INP Ostomy-Wound Consult	Start: 05/27/26 11:30:00 EDT, Leg Wound

NOTE: These tasks are view-only and cannot be documented from this list.

WHY: Enabling the Ostomy-Wound Intervention tab will align provider visibility with existing workflows by providing direct access to wound and ostomy consult orders within the Multi-Patient Task List, reducing the need to navigate outside the MPTL and improving care coordination.

WHY: Comments in Special Instructions are not visible to the lab, increasing the risk of missed or incomplete information. Moving comments to Label Comments ensures critical details are printed directly on the specimen label, improving visibility, communication, and patient safety.

WHEN: Tuesday, June 16, 2026

WHERE: The change will affect the following venue(s):

- Acute/Inpatient
- Ambulatory/WIC
- ED
- Peri-Op

At the following NLH Member Organization(s):

- All NLH Hospitals (excluding Mayo)

WHO: The change will affect the following staff at the above noted locations:

- Lab
 - Nursing
 - Pharmacists
 - Providers
-

EHR Updates

Week of June 11 – June 17, 2026

Inpatient/ED/Peri-Op

Label Comment within Microbiology Lab Orders

WHAT: Microbiology orders will have the **Special Instructions** field removed. All necessary comments should be entered into the **Label Comments** field. This change ensures comments print directly on specimen labels and are visible to the lab.

The screenshot shows the 'Details for Bordetella pertussis PCR (PCR Bordetella pertussis)' form. The 'Order Comments' tab is selected. The form contains various fields for specimen details, including Specimen Type (NASOPHARYNX), Start Date/Time (05/26/2026 1328 EDT), Clinical Indication, Collection Priority (Routine), Frequency (ONCE), Duration, Nurse Collect (Yes/No), Label Comment (highlighted with an orange box), Consulting Physician, and Performing Location (ARLN).

WHY: Comments in Special Instructions are not visible to the lab, increasing the risk of missed or incomplete information. Moving comments to Label Comments ensures critical details are printed directly on the specimen label, improving visibility, communication, and patient safety.

WHEN: Tuesday, June 16, 2026

WHERE: The change will affect the following venue(s):

- Acute/Inpatient
- Ambulatory/WIC
- ED
- Peri-Op

At the following NLH Member Organization(s):

- All NLH Hospitals (excluding Mayo)

WHO: The change will affect the following staff at the above noted locations:

- Lab
 - Nursing
 - Pharmacists
 - Providers
-

Omnicell Technology Conversion – SVH Only (Go-Live June 22 – July 1)

WHAT: Northern Light Health is moving from its existing BD Pyxis system to the modern **Omnicell** platform. The transition will introduce automated dispensing cabinets, anesthesia workstations, central pharmacy dispensing solutions, and **Anywhere RN**, which enables remote medication queuing for Omnicell dispensing within **PowerChart** and **FirstNet**.

NOTE: For more information about **Oracle Cerner Omnicell Anywhere RN**, click [here](#). Additional training materials and resources are available on the Omnicell Training [website](#), and education for this transition will be provided through [HealthStream](#).

WHY: The transition standardizes and modernizes medication management technology across Northern Light Health to support a smoother, more efficient process for managing medications in daily patient care and pharmacy settings.

WHEN: **Monday, June 22, 2026 – Monday, July 6, 2026**

WHERE: The change will affect the following venue(s):

- Acute/Inpatient
- ED
- Peri-Op

At the following NLH Member Organization(s):

- SVH

WHO: The change will affect the following staff at the above noted locations starting on noted dates:

- **Clinical Staff and Pharmacy:** Omnicell XT Automated Dispensing Cabinets (*Go-Live: June 22*)
 - **Pharmacy:** Omnicell Controlled Substance Manager (*Go-Live: June 29*)
 - **Anesthesia and Pharmacy:** Omnicell XT Anesthesia Workstation (*Go-Live: July 6*)
-

EHR Updates

Week of June 11 – June 17, 2026

Page 24 of 32

Physicians, Physician Assistants, Nurse Practitioners

Ambulatory/WIC

Consult Note Template Update

WHAT: The **Referring/Requesting Provider** field within the **Consult Note, Oncology Consult Note** and **Palliative Care Outpatient Consultation Note** has been updated to **Requesting Provider**.

Requesting Provider

- If a referring provider is documented, their name will display as expected.
- If no referring provider is listed, the field will display blank.

Primary Care Physician

Primary Care Physician - TEST MD, PROVIDER

Requesting Provider

BEAULIEU - TEST 01 , SARAH S

WHY: The change simplifies the template, improves clarity in documentation, and ensures consistency for coders while aligning with consult documentation standards.

WHEN: Tuesday, June 9, 2026

WHERE: The change will affect the following venue(s):

- Acute/Inpatient
- Ambulatory (excludes WIC)

At the following NLH Member Organization(s):

- All NLH Hospitals (excluding Acadia and Mayo)

WHO: The change will affect the following staff at the above noted locations:

- Providers
-

Multi-Patient Task List Update: Ostomy-Wound Intervention – Blue Hill & Mercy

WHAT: Wound Care Nurse Practitioners will now be able to access the **Ostomy-Wound Intervention** tab to view wound consults on the **Multi-Patient Task List (Inpt)**.

Ostomy-Wound Intervention

- Patients with an **INP Ostomy-Wound Consult** will populate to the **Ostomy-Wound Intervention** tab within the **Multi-Patient Task List (Inpt)**

5BLA, Assigned Tasks

Transitionist Consult

Ostomy-Wound Intervention

Ostomy Pressure Inj Eval

Task retrieval completed

☒ All Patients		Location/Room/Bed	Name	Task Status	Mnemonic	Order Details
☒ *TESTING, ASHLEY		5BLA / B583 / 01	*TESTING, ASHLEY 02/04/1985	Pending	INP Ostomy-Wound Consult	Start: 05/27/26 14:54:00 EDT, arm consult
☒ *TESTING, INTUNE			*Name Alert			
☒ *TESTING, KENNEDY						
☒ *TESTING, OPIE		605BLA / B580 / 01	*TESTING, INTUNE	Pending	INP Ostomy-Wound Consult	Start: 05/27/26 11:30:00 EDT, Leg Wound

NOTE: These tasks are view-only and cannot be documented from this list.

WHY: Enabling the Ostomy-Wound Intervention tab will align provider visibility with existing workflows by providing direct access to wound and ostomy consult orders within the Multi-Patient Task List, reducing the need to navigate outside the MPTL and improving care coordination.

WHEN: Tuesday, June 16, 2026

WHERE: The change will affect the following venue(s):

- Acute/Inpatient

At the following NLH Member Organization(s):

- NL Blue Hill Hospital
- NL Mercy Hospital

WHO: The change will affect the following staff at the above noted locations:

- Wound Care Nurse Practitioners

EHR Updates

Week of June 11 – June 17, 2026

Label Comment within Microbiology Lab Orders

WHAT: Microbiology orders will have the **Special Instructions** field removed. All necessary comments should be entered into the **Label Comments** field. This change ensures comments print directly on specimen labels and are visible to the lab.

The screenshot shows a web-based form titled "Details for Bordetella pertussis PCR (PCR Bordetella pertussis)". The form has tabs for "Details", "Order Comments", and "Diagnoses". The "Details" tab is active. The form contains several fields: "Specimen Type" (NASOPHARYNX), "Start Date/Time" (05/26/2026 1328 EDT), "Clinical Indications" (a dropdown menu), "Collection Priority" (Routine), "Frequency" (ONCE), "Duration" (a text field), "Nurse Collect" (radio buttons for Yes/No), "Label Comment" (a text field with an orange border), "Free Text Source" (a text field), "Authorization #:" (a text field), "Consulting Physician" (a text field with a search icon), and "Performing Location (ARLN)" (a dropdown menu).

WHY: Comments in Special Instructions are not visible to the lab, increasing the risk of missed or incomplete information. Moving comments to Label Comments ensures critical details are printed directly on the specimen label, improving visibility, communication, and patient safety.
