# EHR Updates

## Week of December 4 – December 10, 2025

### Clinical Decision Support Updates

#### Weekly Newsletter

- Please reference our [CDS Portal](#) for additional information and previous newsletters.
- Any questions should be directed to our [CDS Team](#) for review.

To open the links in the table, right-click and select "Open link in new tab."

Release Date	Venues Affected	CDS Tool	Summary
12/16/2025	Inpatient	<a href="#">PED Palliative-Comfort Care</a>	Content updates include weight-based filtering of the Hydromorphone order. EMMC only

### Leadership

#### Emergency / Inpatient / Peri-Op

### New Sepsis PowerPlan

**WHAT:** The **Sepsis Treatment PowerPlan** will replace the current **Sepsis Advisor** for managing suspected sepsis cases. Alerts will continue to trigger in the same locations; however, instead of opening the Sepsis Advisor, users will now have the option to launch the Sepsis Treatment PowerPlan.

**WHY:** This change is being implemented to improve clinical efficiency and patient outcomes. The Sepsis Treatment PowerPlan provides:

- **Streamlined Workflow:** Combines evidence-based interventions into a single, easy-to-use plan.
- **Enhanced Clinical Guidance:** Offers standardized treatment steps aligned with current best practices.
- **Reduced Variability:** Ensures consistent care across all applicable venues and staff.
- **Improved Patient Safety:** Facilitates timely initiation of sepsis management, reducing risk of complications.

**NOTE:** This update supports NLH's commitment to quality care and operational excellence.

**WHEN:** Thursday, December 18, 2025

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient (to include ED & Peri-Op)

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Acadia and Mayo)

**WHO:** The change will affect the following staff at the above noted locations:

- Nursing
- Providers

---

## EHR Updates

### Week of December 4 – December 10, 2025

The screenshot displays a Sepsis Treatment PowerPlan in an EHR system. The interface includes a toolbar with options like 'Add to Phase', 'Check Alerts', 'Start', and 'Duration'. Below this is a table with columns for Component, Status, Dose, and Details. The main content area lists various clinical criteria and interventions, including Sepsis Bundle, Sepsis 2 Criteria (SIRS and Severe Sepsis), and specific medication orders like Sodium Chloride 0.9% and Lactated Ringers Injection. A 'Supportive Meds' section at the bottom lists acetaminophen (Tylenol). At the bottom of the interface are buttons for 'Dx Table', 'Orders For Co-signature', 'Save as My Favorite', 'Plan for Later', and 'Initiate Now'.

**WHY:** This change is being implemented to improve clinical efficiency and patient outcomes. The Sepsis Treatment PowerPlan provides:

- **Streamlined Workflow:** Combines evidence-based interventions into a single, easy-to-use plan.
- **Enhanced Clinical Guidance:** Offers standardized treatment steps aligned with current best practices.
- **Reduced Variability:** Ensures consistent care across all applicable venues and staff.
- **Improved Patient Safety:** Facilitates timely initiation of sepsis management, reducing risk of complications.

**NOTE:** This update supports NLH’s commitment to quality care and operational excellence.

**WHEN:** Thursday, December 18, 2025

**WHERE:** The change will affect the following venue(s):

- Acute/Inpatient (to include ED & Peri-Op)

**At the following NLH Member Organization(s):**

- All NLH Hospitals (excluding Acadia and Mayo)

**WHO:** The change will affect the following staff at the above noted locations:

- Nursing
- Providers

**Physicians, Physician Assistants, Nurse Practitioners**

**Emergency / Inpatient / Peri-Op**
