

Accessing PowerForms from MPages

When accessing PowerForms through the MPage, please note these open the same form each time. For example, if a patient is having two surgeries done during their inpatient stay, staff needs to access the Preprocedure Checklist Form from adhoc for the second surgery because the MPage will open the form documented for their first surgery as if to modify.

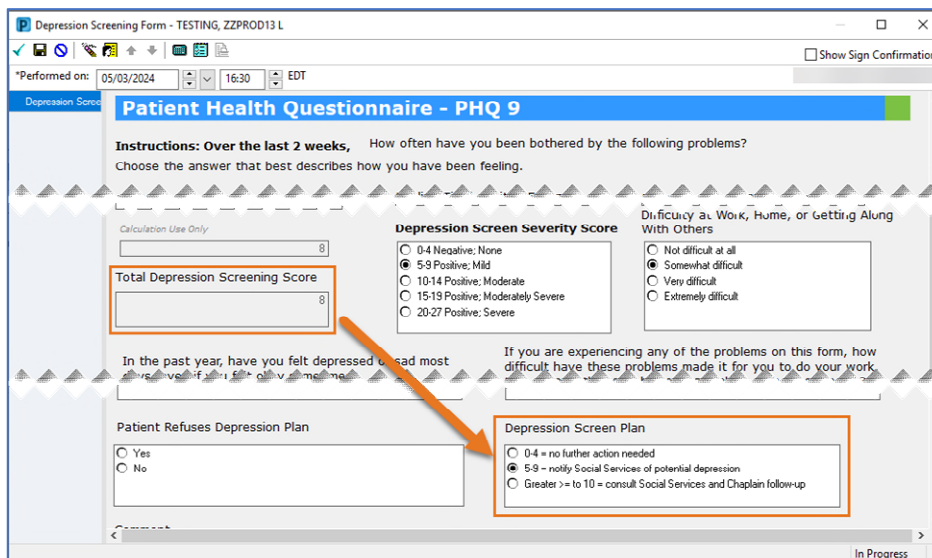

In this issue...

Accessing PowerForms from MPages	1
Depression Screen Plan Field	1
Telehealth Update & Reminder	2
CI Portal – “What’s Happening” Section	2

Depression Screen Plan Field

When documenting a depression screen, the **Total Depression Screen Score** must be marked in the corresponding range within the **Depression Screen Plan** field. Marking this field is a satisfier for the Depression Screen and Depression Management recommendations.

For additional information on the Depression Screen measure, please refer to the Primary Care Quality Measures & Recommendations Guide found [here](#).

Telehealth Update & Reminder

The Telehealth team has created an Ambulatory Telehealth Newsletter to be distributed quarterly. To view the newsletters and other helpful Telehealth information, visit the [Telehealth](#) portal.

As a reminder, using the **/telehealth** auto text is a requirement for documenting telehealth visits. Avoid removing any fields from the auto text because every field is necessary for telehealth documentation.

CI Portal – “What’s Happening” Section

A new section on the [CI Portal](#) titled **What’s Happening** is where all “Office of Clinical Informatics” memos/communications are posted in pdf format, making them easier to locate and print. Memos for the current month and previous month are posted.

Memos from the Office of Clinical Informatics are sent via email on a regular basis. Here you will find those sent during the current month, as well as those sent the previous month.

Current Month

- [Hanger Clinic Diabetic Shoe Referral Workflow \(May 2\)](#)
