## Sepsis IV Exclusion Auto Text

The auto text **/sepsisIVexclusion** includes **the patient has an LVAD** and **the patient refused IVF** to the second dropdown. This keeps documentation up to date with the current CMS guidelines for Sepsis.

System Disruptions Reminder

Disruptions/Downtime/Performance Issues:
- If unexpected disruptions/downtime/performance issues occur, check the NLH Intranet IS System Status page to see if the issue is posted, if not, contact the Help Desk.
  - Click **Menu** on the top of the Home Intranet page.
  - Click **IS System** Status to open.
- Often issues may be resolved quickly and they are not reported on the IS System Status page.
- Information on the IS System Status page includes the identified issue, workarounds, and approximate resolution time (if known), and is updated as more information is obtained.

Routine Maintenance:
- Oracle Cerner regularly schedules and facilitates routine maintenance. These events may require a service disruption or downtime. You will be notified in advance if a planned disruption or downtime is required.
- Capacity Management and Transfer Center undergo weekly maintenance (Wednesday PM – Thursday AM).

Tip: Bookmark the IS System Status **page for quick access to view reported issues.**
