

Thank You!

From February 3 to February 5, NLH experienced the longest downtime since implementation of the EHR. The CNIOs, CMIOs, and VP of Digital Transformation and Performance would like to commend everyone on the amazing teamwork we witnessed. This experience identified process improvement opportunities in several different areas. Teams will be assembled to address the various challenges over the coming weeks.

For those who worked during this downtime, THANK YOU. Your flexibility and focus on the delivery of high-quality safe patient care did not go unnoticed.

To the members of our **IS team** who selfishly gave their time and talents over the course of the weekend to ensure our environment was safe and restore our EHR as quickly as possible, THANK YOU.

To our **Clinical Informatics staff** who provided support to ensure critical patient information was restored to the EHR, THANK YOU.

The patients served by NLH are extremely fortunate to have such dedicated teams work together to ensure the delivery of care continued uninterrupted. THANK YOU!

In this issue...

Thank You!	1
Mandatory and Allowable Disclosures	1
Surgical MPage Updates for CAM Assessment	2

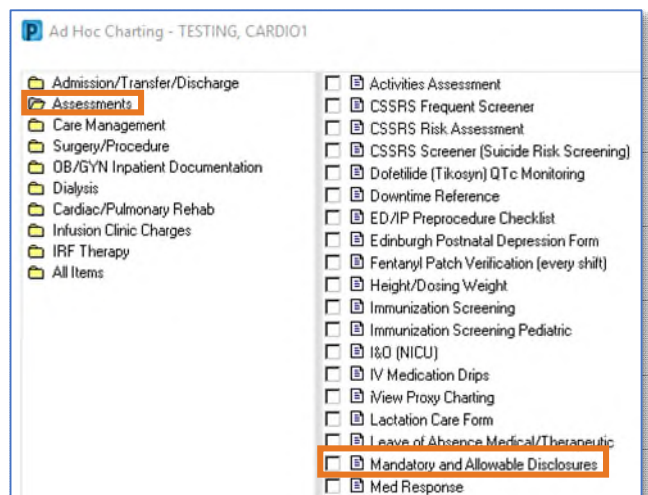

Mandatory and Allowable Disclosures

Where can mandated reporting be documented?

Mandated reporting is documented in the **Mandatory and Allowable Disclosures** form located in numerous Adhoc folders. Ambulatory practices will find the form in the Ambulatory root folder.

Click [here](#) for more information about the Mandatory and Allowable Disclosures form.

Surgical MPage Updates for CAM Assessment

Where can surgeons easily locate the CAM-ICU Assessment Results?

The ICU Liberation Bundle has been added to the Surgery Inpt 2019 and Trauma Surgery Inpt 2018 tabs in Provider View. The addition of the component will allow easy access to the CAM ICU Assessment results.

The image displays two screenshots of a clinical information system interface. The top screenshot shows the 'ICU Liberation Bundle' section for a patient, with a table of scores and results. The bottom screenshot shows the same bundle details, but with a 'Labs' section below it, indicating 'No Results Found'.
