Code Upgrade

Visual updates

Visual display

- Windows will now display without borders within Cerner.
- The Idle timer will display in an aqua color.

Chronological View

- Vital signs will display the most recent results documented.

Wednesday, June 28, 2023 (4 minutes ago)						
Vital Signs	17:05	T: 37.6 Not Specified	HR: 80	BP: 120/80 Cuff	BEAULIEU, SARAH S	70d 01h 44m
Vital Signs	17:08	BP: 130/90 Cuff			BEAULIEU, SARAH S	70d 01h 47m

Emergency Department

Enhanced Tracking Board

- When a patient's Administrative Sex, Birth Sex, or Gender differ, an indicator will display on the FirstNet Enhanced Tracking Board, as it does on the banner bar when in the patient's record.
 - This information will be found within the Birth Sex/Gender Identity column.

Acute Case Management

Printing Reports

- The Type is displayed in the FIN/Visit Reason/Attending/PCP column instead of the LOS/ELOS column.
- The medical service is displayed on the Acute Case Management responsive worklist.
- Important notes on the Print Report are marked with an asterisk.

Alerts

PowerForms

- When you sign a PowerForm, the system now displays a Sign Charting confirmation dialog box when you attempt to sign a PowerForm.

- Select **Do not show sign confirmation again** to not display this dialog box moving forward.
 - To display the **Sign Charting** confirmation window again, check the box, **Show Sign Confirmation**, in the top right of any PowerForm.

- In the **Workflow Recommendations** component, when you try to open a PowerForm from the **Actions** menu, an error is displayed.

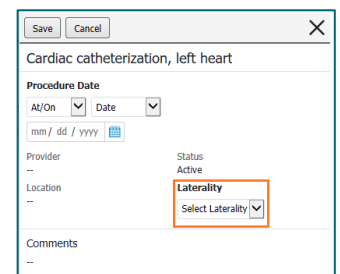

MPage Updates

Histories Component

- The **Laterality** of a procedure can now be added or modified.

Home Medication Component

- The **Legal Expiration** date for a prescription displays below **Refills** in the **Supply Remaining** column.

Clinical Charge Entry Component

- If the wrong note was associated to a charge, the correct note can be associated within the **Clinical Charge Entry** component with the applicable charge.

STEP 1: From within the submitted charge section, single-click the charge in question and select **Modify**.

STEP 2: Click **Change Selected Note** next to the note to be changed.

STEP 3: Select the appropriate note and click **OK**.

Code Upgrade

STEP 4: Click **Submit** to save the modifications.

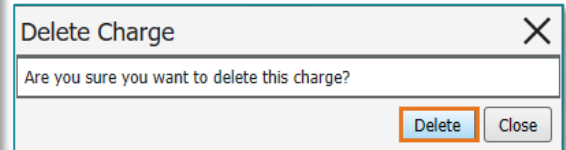

➤ Providers are able to delete and modify submitted charges from the Clinical Charge Entry component.

STEP 1: From the submitted charge section, single-click the charge.

STEP 2: Click **Delete** to remove the charge.

STEP 3: Click **Delete** to confirm.

STEP 4: Refresh the component.

STEP 5: The note will be available to add the charge.

Known Issues

HealthCare

➤ The Potential Cases List (PCL) displays only the initial list of up to 20 candidates when you filter, sort, or advance to additional pages of the candidate list.

Zooming in – Immunization Component

➤ The Workflow Immunizations component is not displayed correctly if you zoom in or open the component on various screen sizes.

Special Characters – CM Note

- A known issue is currently occurring that is adding special characters to the Discharge planning notes.

Printing a Patient List

- When printing a patient list, additional steps will be needed to locate the applicable printer the first time to make this the default printer.

- STEP 1:** Select the **Other Output Devices** tab within the Output Destination window.
- STEP 2:** Locate the location in which you are located and single select.
- STEP 3:** Right-click the printer and select **Select as Default**.
- Right-click the printer to Add to Favorites and to be available within the **Favorites** tab.

Navihealth/CarePort Errors

- Sporadic issues are occurring, impacting successful transmission of packets. IS is working on a resolution. If a packet is not sent successfully, downtime process should be followed.

Cardiovascular March Out

- The March out menu is still displaying on the screen when the viewer is minimized. Open the ECG study via the Cardiology Worklist to prevent this from occurring.

Pharmacy Medication Manager

- When a PRN order is placed from PowerChart or MedManager, the PRN reason is not displayed.
 - Perform a Verify, Modify, Inquire, or History action to the order to view the PRN reason.

For questions regarding process and/or policies, please contact your unit's Clinical Educator or Clinical Informaticist. For any other questions please contact the Customer Support Center at:
207-973-7728 or 1-888-827-7728.
