

Nursing protocol orders allow nurses to activate an order from a provided order set based on nursing judgement without needing to contact the provider. Protocol orders include medications, vaccines, and IV care solutions.

### Initiating Orders in MedSurg Nursing Protocol Order MAYO:

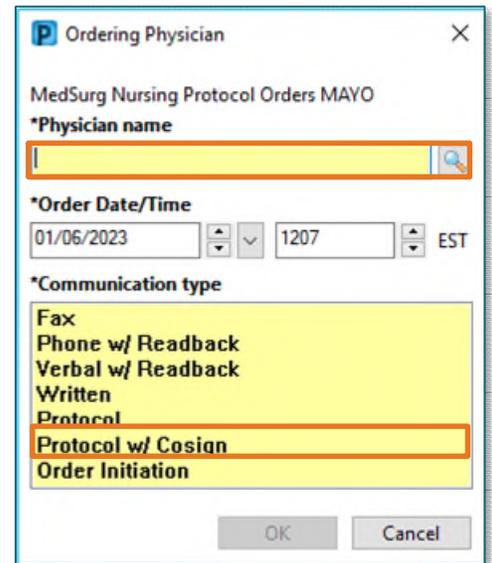

**STEP 1:** Navigate to **Orders | Plan of Care** in left side menu.

**STEP 2:** Click **+Add**. 

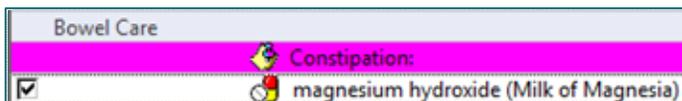

**STEP 3:** In **Order Search** window, search for and select **MedSurg Nursing Protocol Order MAYO**.

**STEP 4:** The **Ordering Physician** window displays.

- Search for attending provider, select appropriate provider.
- Select **Communication type** to **Protocol w/ Cosign**. Select **OK**.

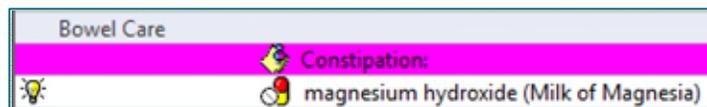

**STEP 5:** Select the orders needed.

**STEP 6:** Select **Initiate Now**  in bottom right corner.

**STEP 7:** The **Orders For Signature** window displays. Orders chosen now has a lightbulb instead of a checkmark. 

**STEP 8:** Select **Orders For Signature**  in the bottom right corner.

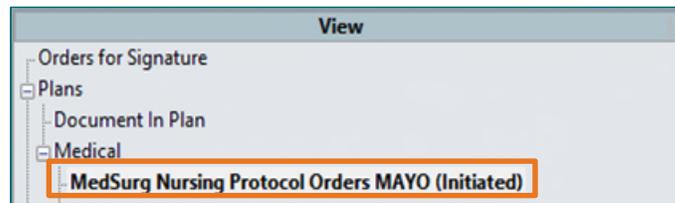

**STEP 9:** Refresh **Order** page to see newly placed orders.

### Initiating subsequent orders in MedSurg Nursing Protocol Order MAYO PowerPlan:

**NOTE:** Once the Protocol PowerPlan has been initiated, use the already initiated PowerPlan to add protocol orders. Do not order a second PowerPlan.

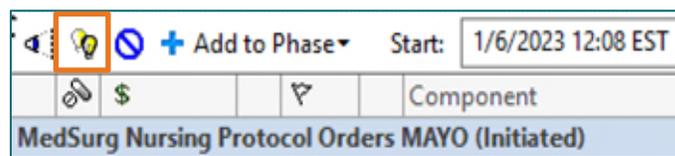

**STEP 1:** Navigate to **Orders | Plan of Care** in left side menu.

**STEP 2:** In the **View** menu select **MedSurg Nursing Protocol Orders MAYO**.

**STEP 3:** In the **Order View** pane select the **lightbulb** to initiate another order in the PowerPlan.

**STEP 4:** All available orders in the PowerPlan will appear select order needed. Return to **STEP 5** of initiating orders to complete initiating and ordering.

**NOTE:** Nurses are never allowed to use the **Add to Phase** button, this is a provider only functionality.
