A score greater than 10 signifies a risk of domestic violence abuse.

Future Changes

To Be Determined

- Allergies will be updated with a new look and feel for a more user-friendly experience.
 - No changes to the MPage component at this time, the update will occur in patient's charts, forms, scheduling appointment book, PharmNet, and RadNet.
- Reverse Interaction Checking will automatically run each time new allergies are entered and can be run at any time by clicking Reverse Allergy Check button.
 - **Interaction is found:** Red warning populates with details. This is not auto dismissed.
 - **No interaction is found:** Green checkmark with text **Success. No Drug Interaction found** This message will auto-dismiss after five seconds.
- MyExperience Replacement
 - Planned for November/December, **MyExperience will be replaced with Role Profiles**. In the future, if more than one role exists there will be a prompt to choose a role when logging into an application.
