Ambulatory

Bright Futures Intake – Infant

- Bright Futures Birth History documentation field *EGA at birth* replaced *Gestation Control. Delivery Type Birth* field has been moved underneath.

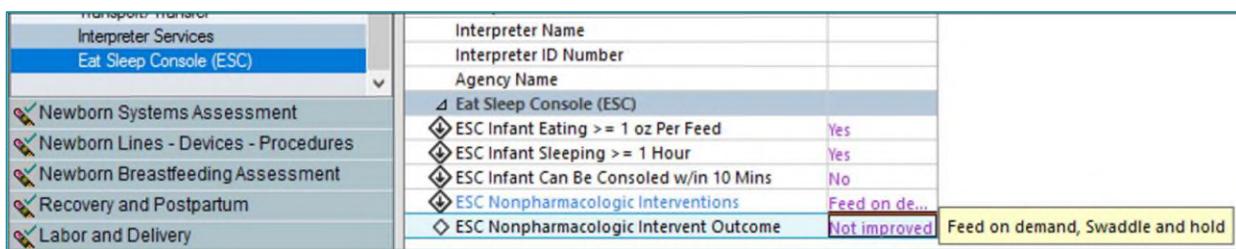

The screenshot shows a software application window titled "Bright Futures Intake - Infancy (Birth to 9 months)". The left sidebar contains a navigation menu with various sections like "Summary", "ID Risk Screen", "General Info", etc. The main area is titled "Birth History". At the top of this section, there is a field for "Gestational Age At Birth" with the value "28 week(s) 1 day(s)". Below this is a "Method" dropdown set to "Estimated Gestational Age". There is also a "Comment" text area. At the bottom of the "Birth History" section, there is a "Delivery Type Birth" section containing a grid of radio buttons for different delivery types. The entire "Birth History" section is highlighted with a red border. Below it, the "Delivery Type Birth" section is also highlighted with a red border.

Women's Health

Eat Sleep Console (ESC)

- Newborn Systems Assessment has a new IView section called *Eat Sleep Console (ESC)*.
➤ The documentation helps identify newborns who may be suffering from neonatal opioid withdrawal syndrome.

The screenshot shows a software interface for the Eat Sleep Console (ESC). On the left, there is a tree view of clinical assessments: "Transport/Transfer", "Interpreter Services", and "Eat Sleep Console (ESC)" which is expanded to show "Newborn Systems Assessment", "Newborn Lines - Devices - Procedures", "Newborn Breastfeeding Assessment", "Recovery and Postpartum", and "Labor and Delivery". On the right, there is a table with columns for "Interpreter Name", "Interpreter ID Number", "Agency Name", and "Edit". The table rows correspond to the selected assessment. The last row, "ESC Nonpharmacologic Intervent Outcome", has a note: "Feed on demand, Swaddle and hold".

Interpreter Name	Interpreter ID Number	Agency Name	Edit
△ Eat Sleep Console (ESC)			
◆ ESC Infant Eating >= 1 oz Per Feed	Yes		
◆ ESC Infant Sleeping >= 1 Hour	Yes		
◆ ESC Infant Can Be Consoled w/in 10 Mins	No		
◆ ESC Nonpharmacologic Interventions	Feed on de...		
◆ ESC Nonpharmacologic Intervent Outcome	Not improved	Feed on demand, Swaddle and hold	

Emergency

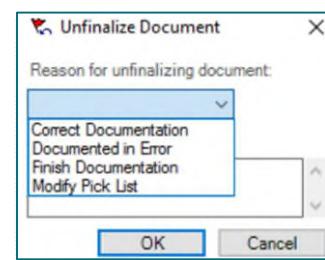

Provider Note/Discharge/Release Note

- Provider Note/Discharge/Release note type will be available in the Emergency Physician Workflow page.

Surgery

Periop Doc Prompt

- A new prompt will display that requires a reason for unfinalization when attempting to unfinalize a perioperative document.

Pharmacy

Use by on Pharmacy Labels

- *Expires* will be replaced on pharmacy labels by *Beyond Use Date/BUD* or *Use By* to meet state requirements.

Future Changes

To Be Determined

- Allergies will be updated with a new look and feel for a more user-friendly experience.
 - No changes to the MPage component at this time. The update will occur in patient's charts, forms, scheduling appointment book, PharmNet, and RadNet.
- Reverse Interaction Checking will automatically run every time new allergies are entered and can be run at any time by clicking Reverse Allergy Check button.
 - **Interaction is found:** Red warning populates with details. This is not auto-dismissed.
 - **No interaction is found:** Green checkmark with text **Success. No Drug Interaction found.** The message will auto-dismiss after five seconds.
- MyExperience Replacement
 - Planned for November/December, MyExperience will be replaced with Role Profiles. If more than one role exists, there will be a prompt to choose a role when logging into an application.
