Northern Light Health

---

Cardiac and Pulmonary Rehab staff have three PowerForms located in Adhoc in addition to the required documentation in ScottCare or LSI. Documentation in ScottCare is either printed and scanned into the EHR or transmitted via an interface.

Orders

The **Cardiac Rehab Medical Outpatient Eval** order requires a diagnosis to be entered by the provider. (No reimbursement if a qualifying diagnosis is not listed.)

➢ One of the following Diagnosis is required:

- EF = < 35%
- MI
- Angina
- Hx of Cardiac Bypass/Valves

Cardiac/Pulmonary Rehab Documentation

➢ Cardiac/Pulmonary Rehab staff document in ScottCare or LSI.

➢ Three PowerChart PowerForms are available for Cardiac Pulmonary Rehab documentation:

- 6-Minute Walk Test
- Angina Survey Form
- Depression Screening Form

NOTE: Continue to document the 6-Minute Walk in ScottCare or LSI if it is available in that system.

NOTE: Keep the paper versions of these forms available in a Downtime Toolkit to be used in the event of a Cerner Downtime.

Printing and Scanning ScottCare or LSI Documentation

➢ Cardiac/Pulmonary Rehab staff at all MOs except for **EMMC, SVH,** and **CA Dean** are being asked to print the documentation that occurs in ScottCare or LSI at certain intervals in the patient's Cardiac/Pulmonary Rehab and scan or have it scanned into the patient's Cerner Electronic Health Record (EHR).

- After the initial visit
- After the 30-day mark
- At discharge from rehab

➢ Printing the ScottCare or LSI documentation and having it scanned into PowerChart allows the information to be visible to all that may need it if the patient should have an Emergency Department visit or hospital admission during their rehab.

➢ **SVH, CA Dean,** and **EMMC** use a version of ScottCare that allows for electronic interface transfer of documentation, so printing is not required. The flyer on how to follow this process is located [here].

Locating the Documented Forms in PowerChart

Completed documentation of the new PowerForms can be found in **Documentation** and/or the **Notes** link in the Menu.

➢ In **Documentation,** locate the form and click to view in the reading pane to the right.

➢ In **Notes,** locate the **Clinical Documentation** folder to open.

- Locate the **TR_Angina Survey Form** folder and expand.

- If there is more than one form, click the applicable form to view in the reading pane to the right.
