

The Advanced Growth Chart gives the clinician the ability to document and view patient changes over time.

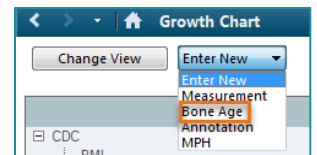

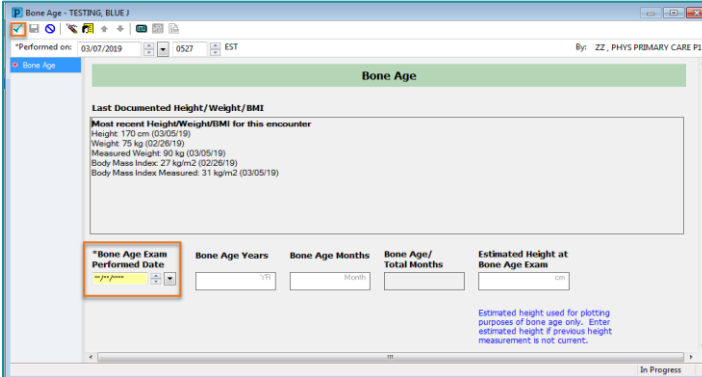

Growth Chart Features

The Advanced Growth Chart is accessed from Amb Pediatrics 2018 Mpage by selecting the Advanced Growth Chart section.

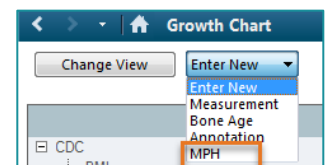

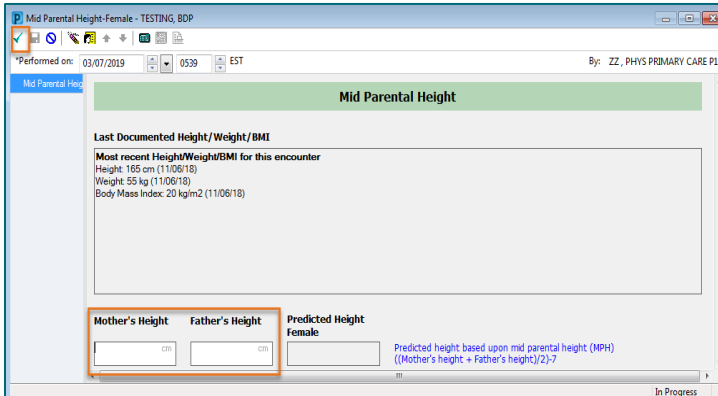

➤ Bone Age Entry

- To add a Bone Age, from the growth chart, select **Enter New**.
- From the drop down, select **Bone Age**.
- Enter the desired values and click the green checkmark to sign the form.
- Values will display on the growth chart.

➤ Mid Parental Height (MPH) Entry

- To add an MPH, from the growth chart, select **Enter New**.
- From the drop down, select **MPH**.
- Enter the desired values and click the green checkmark to sign the form.

➤ Viewing Results

- Bone Age will display with a Delta Sign on the graph.
- MPH will be indicated with an arrow on the right-hand side of the graph at the calculated height.

➤ Changing the Display

- From the Navigator Pane, the Advanced Growth Chart can be changed to a different scale.
- Click the button with the three lines on the right of the window and select the desired view.
