**The Advanced Growth Chart is a useful tool for clinicians and clinical staff to document, track, and assess the growth and development of pediatric, newborn, and pre-term patients.**

Advanced Growth Chart

The Advanced Growth Chart component is visible on the Amb Pediatrics 2018 MPage. The component displays results in a flowsheet format. Clicking the **Header** of the component will open the Growth Chart in the Table of Contents to view the results compared to the percentile growth curves on a graph. This view allows for editing of views and providing additional documentation that affects the results.

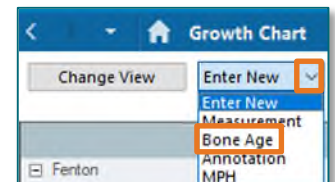

➢ **Bone Age Entry**

- To add a Bone Age Entry, from the Growth Chart view, click the **Enter New** dropdown.

- Select **Bone Age**.

- The **Bone Age** PowerForm will display. Enter the appropriate values, then save the form by clicking the **green checkmark** icon.

- The added values will now display on the Advanced Growth Chart.
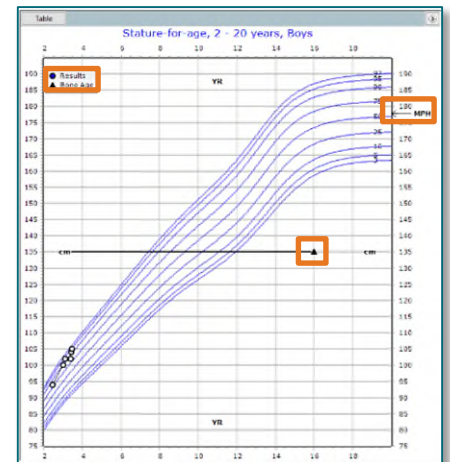

➤ **Mid Parental Height (MPH) Entry**

- To add a MPH Entry, from the Growth Chart view, click the **Enter New** dropdown.

- Click **MPH**.

- The **Mid Parental Height** PowerForm will display. Enter in the appropriate values then save the form by clicking the **green checkmark** icon.

➤ **Viewing Results**

- Bone Age will display with a **Delta Sign** on the graph.

- MPH will be indicated with an arrow on the right-hand side of the graph at the calculated height.

➤ **Changing Views**

- The Advanced Growth Chart grid can be changed to display different information as appropriate by selecting the **Change View** button

- The **Change View** window will open. Selections in this window will affect how the grid displays information.

➢ **Changing the Advanced Growth Chart Component Display**

- From the MPage, the Advanced Growth Chart component can be chaged to display a different scale.

- Click the button with the three lines on the right of the window and select the desired view.
