
THA/TKA Patient-Reported Outcomes is a regulatory documentation requirement for those patients who have a Total Hip or Total Knee Arthroplasty. The goal of documenting this information is to measure improvement in a patient's self-assessment of their pain and functional status.

Who Should Have This Documentation Completed

- Patient is undergoing an **elective total hip arthroplasty (THA)** or **elective total knee arthroplasty (TKA)**, including bilateral (same day) procedures.
- Patient who is enrolled in **Medicare fee-for-service** (Medicare Advantage Patients are excluded).
- Patient is **age 65 years or older**.

NOTE: **Failure to document this form when the patient meets the above criteria results in financial penalties for the hospital.**

Documentation to be Completed Preoperatively

- The entire **THA/TKA Patient Reported Outcomes PowerForm** should be documented **0-90 days prior** to the procedure.
- **KOOS, JR. Adult Knee Survey section**
 - Documented if a patient is having a **TKA**.
- **HOOS, JR. Adult Hip Survey section**
 - Documented if a patient is having a **THA**.
- **Preoperative documentation** is completed by:
 - **AR Gould and MCH**
 - Completed by the Orthopedic practice.
 - **Mercy**
 - Completed by the Mercy Orthopedic practice.
 - Completed by PAT if provider is NOT employed by NLH.

Documenting the THA/TKA Patient-Reported Outcomes PowerForm

- In the first section, documenting **Preoperative Survey** or **Postoperative Survey** in **Survey Type** will open the **Generic PROM Version** box for selecting the Promis Global Version 1.2 for documentation.
 - Documentation of the **PROMIS Global 10** section is only required preoperatively.
-

- Documentation of **Left** or **Right hip replacement** in **THA Procedure Type** will open the **HOOS, JR. Adult Survey** section for documentation.
- Documentation of **Left** or **Right knee replacement** in **TKA Procedure Type** will open the **KOOS, JR. Adult Survey** section for documentation.

THA/TKA Patient-Reported Outcomes - TESTING, ZZPROD1

THA/TKA Patient-Reported Outcomes

THA/TKA Patient-Reported Outcomes

Total Hip Arthroplasty/Total Knee Arthroplasty (THA/TKA) Patient-Reported Outcome-Based Performance Measures (PRO-I)

Survey Type

☐ Preoperative survey
☐ Postoperative survey

THA Procedure Type

☐ Left hip replacement
☐ Right hip replacement

TKA Procedure Type

☐ Left knee replacement
☐ Right knee replacement

Date of Patient-Reported Outcome-Based Data Collection

no previous dates

Mode of Collection

☐ Paper
☐ Telephone (interactive voice response)
☐ Electronic (web-based, EHR, etc.)

Person Completing the Survey

☐ Self
☐ Surrogate

Have you been taking narcotics for more than 90 days?

☐ No
☐ Yes

What amount of pain have you experienced in the last week in your nonoperative knee/hip?

☐ None ☐ Severe
☐ Mild ☐ Extreme
☐ Moderate

Generic PROM Version

☐ PROMIS-Global version 1.2

Documentation to be Completed Postoperatively

- Documentation should occur **300-425 days postoperatively**.
- Sections to be completed postoperatively:
 - **THA/TKA Patient-Reported Outcomes**
 - **KOOS, JR. Adult Knee Survey**
 - Documented if a patient is having a **TKA**.
 - **HOOS, JR. Adult Knee Survey**
 - Documented if a patient is having a **THA**.
- **Postoperative documentation** is completed by:
 - **AR Gould and MCH**
 - Completed by the Orthopedic practice.
