Once a pregnancy has been opened, modifying the method used to determine the patient's estimated date of delivery is performed in the EDD Maintenance component of the Prenatal MPage. The estimated date can also be updated in this component.

Maintaining Estimated Date of Delivery (EDD) Information

Updating this information will provide an accurate tracking of the EDD.

➢ **EDD Maintenance – Modifying Current Method**

For example, the EDD was determined through Last Menstrual Period (LMP) and the patient has provided updated information.
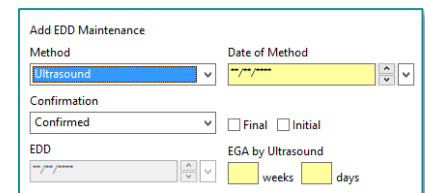

STEP 1: Select **Modify EDD** from the EDD Maintenance Component.

STEP 2: Update existing EDD information with the new details.

STEP 3: Click **OK** to save update to existing EDD.

➢ **EDD Maintenance – Adding a New Method**

This is the recommended workflow when adding an ultrasound that alters the patient's EDD or a confirmation ultrasound for dating.

**STEP 1:** Click the + sign to open the EDD Maintenance Box.

STEP 2: Click the drop down under **Method** and select the appropriate option.

STEP 3: Complete the required fields, as indicated by yellow highlights.

STEP 4: Check the box **Use this estimate for EDD calculations** this will identify which authoritative EDD method is being used for the date. Then and click **OK**.
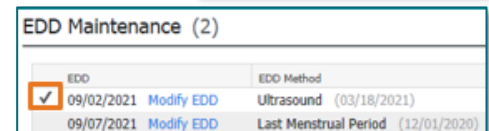

- A checkmark will appear in front of the method being used as the authoritative method for dating of the pregnancy EDD.

NOTE: The updated information will display in the EDD Maintenance and the Pregnancy Overview components.
