

## From the Office of Health Informatics FetaLink Ambulatory Documentation July 9, 2025

FetaLink is an application used by clinicians to monitor maternal and fetal data during the different phases of labor. FetaLink allows for data to be displayed in a meaningful and useful format to clnicans in the ambulatory and inpatient settings.

## **Documentation Integration**

Ambulatory practices will document the Fetal Monitoring episdoe after the Non-Stress Test order has been placed from the WE Quick Order Mpage by entering a Reason for Monitoring and any necessary nursing annotations in FetaLink.

## Documentation in FetaLink

- Documenting Reason for Monitoring:
  - Associate the patient to the monitor.
  - From the Census view, select the column Reason for Monitoring.
  - Associate the patient to the correct encounter.
  - Select Reason for Monitoring.
  - Select the reason for monitoring from the provided list.
  - Select **OK**.

# NOTE: During the monitoring episode, address any alerts and create an annotation.

- Creating an Annotation for an alert:
  - Select the **paper clip** icon.
  - Select options from the quick picks.
  - If the options are not appropriate, free text in the annotation box.

### Documentation in PowerChart from FetaLink

• Annotations flow automatically to the FHR Annotations Field found in the Antenatal Testing Band of Interacitve View and I & O.
