

PowerChart Maternity allows information from within Northern Light Health ambulatory to cross to the inpatient setting improving the continuity of care provided throughout the patient's pregnancy and ensures all members of the healthcare team to have the information necessary for delivering high-quality care for our patients. This flyer will demonstrate how to document outside prenatal labs in the inpatient setting.

Prenatal Lab Documentation

There are two AdHoc forms available to document prenatal labs performed outside Northern Light Health. Both forms are accessible from the Triage/Ante/Labor MPage in the Prenatal Labs & Tests component.

➤ Documenting Outside Labs from non-NLH providers

- From the drop-down within the Prenatal Labs & Tests component, select either **Outside Labs** or **Transcribed Prenatal Lab Form**.
- These Powerforms have multiple sections available to document on.
- The form needs to reflect each day of service and the location where the lab was performed at.
- Change the Performed On Date and Select the Appropriate Facility before entering the lab data.

*Performed on: EDT

Have you changed the date from "Performed On" to the COLLECTION DATE for the labs you are about to document?

Yes

➤ Viewing Prenatal Labs and Tests

- In the Prenatal Labs & Tests Component, you can view the results that we entered as transcribed prenatal labs.
- These will display with **Outside Lab** in front of the name of the test.

Test Name	Result	Result Date	Gestational Age
PCM Labs			
Outside Lab - Blood Type	O	AUG 01, 2020	22w 4d
Outside Lab - Rh Type	Negative	MAY 28, 2020	13w 2d
Outside Lab - Amphetamine Urine	Negative	AUG 03, 2020	22w 6d

- In addition, they are viewable in Results Review.

NOTE: Prenatal Labs need to be entered in a timely fashion from outside facilities to facilitate effective patient care. These lab results aid the provider in their decision-making efforts.
