

The Acadia Operational Whiteboard is an interactive visual management tool used to increase patient safety and eliminate documentation redundancies. This is a dynamic alternative to the handwritten whiteboard and can be used by the entire interdisciplinary team to view patient staffing, essential patient information, and improve communication across the care team.

Operational Whiteboard Access

➤ To access the CareView Dashboard from a personal workstation, click the **CareView** icon from the Cerner Storefront.

- Select **Login** on the Environment screen.
- Enter network **Username** and **Password** on the **Oracle Health** login page.
- Once the solution is open, users can select the gear icon to display different units for review.

Dashboard Overview

➤ On the right-side of the display, two tabs are available.

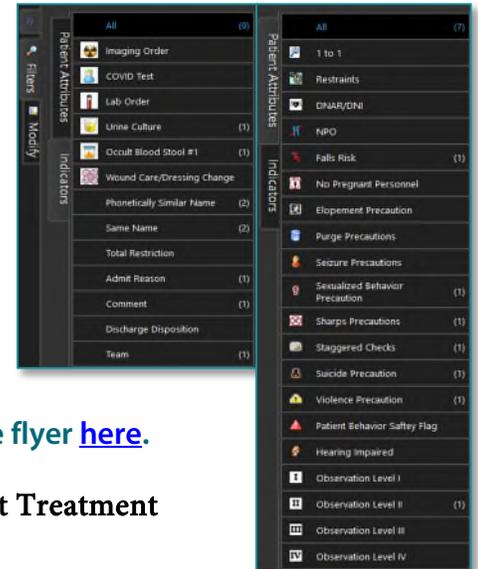

- **Filter:** Used to identify patients based on selected Patient Attributes or Indicators.
- **Modify:** Allows for users to select a specific patient and modify **Admit Reason, Comments, and Team.**

- **Bed:** Color coding pulls in from Capacity Management.
- **Patient:** Only initials display for HIPAA compliance.
- **Nurse:** RN assigned to the patient through Clairvia Assignment Manager.
- **Team:** Manual documentation of the team assigned to this patient.
- **Admit Reason:** Manually documented reason for admission on the operational whiteboard.

- **Legal Status:** Identifies if the patient is voluntarily or involuntarily at the facility documented in the **BH Inpatient Treatment Plan**.
- **BH Attributes:** Patient attributes align with Capacity Management icons.
- **Orders/Patient Indicators:** Patient orders pulled in from the chart and manual comments and admit reasons documented on the board.
- **Sleep Time:** Total patient sleep pulled from documentation.
- **LOS:** Amount of time the patient has been admitted to the facility.
- **ADOD:** Date will display documentation entered by the clinician on the **BH Inpatient Treatment Plan** form.
- **Disch Dispo:** This is pulled from documentation within the **BH Inpatient Treatment Plan** form.
- **Comments:** Important information documented manually for staff to see on the board.

NOTE: To view more information on ADOD documentation, view the flyer [here](#).

Documenting Manual Comments & Admit Reason

To create visual notification quickly on the board, comments and admit reasons can be manually documented for each patient.

STEP 1: Select the **Modify** tab on the right side of the screen.

STEP 2: Select the appropriate **Patient/Room**.

STEP 3: Select the appropriate field to add information.

- **Admit Reason** – manually document admit reason on the whiteboard.
- **Comment** – to add information to the comment column.
- **Team** – to manually document the team.

STEP 4: Document **Comment** or **Admit Reason**.

- Select **OK**.

STEP 5: Select the **Filters** tab to get out of modify mode.

STEP 6: Select the  to close the side bar.
