Cerner Millennium FirstNet
Blood Product Administration

November 27, 2019

On Tuesday, December 17, 2019, the Blood Product Administration band will be pulled into Interactive View and I&O, to ensure process and documentation of blood product administration is consistent with inpatient nursing.

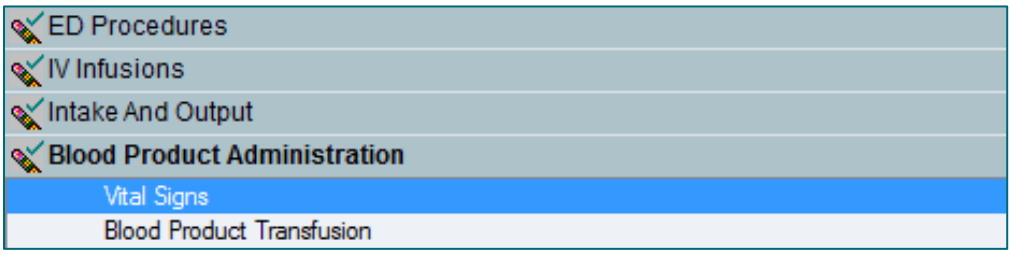

Pre Transfusion Checklist PowerForm

The Pre Transfusion Checklist PowerForm will be moved into the ED Forms AdHoc folder for ease of use and discovery.

➢ Blood Product Administration Documentation

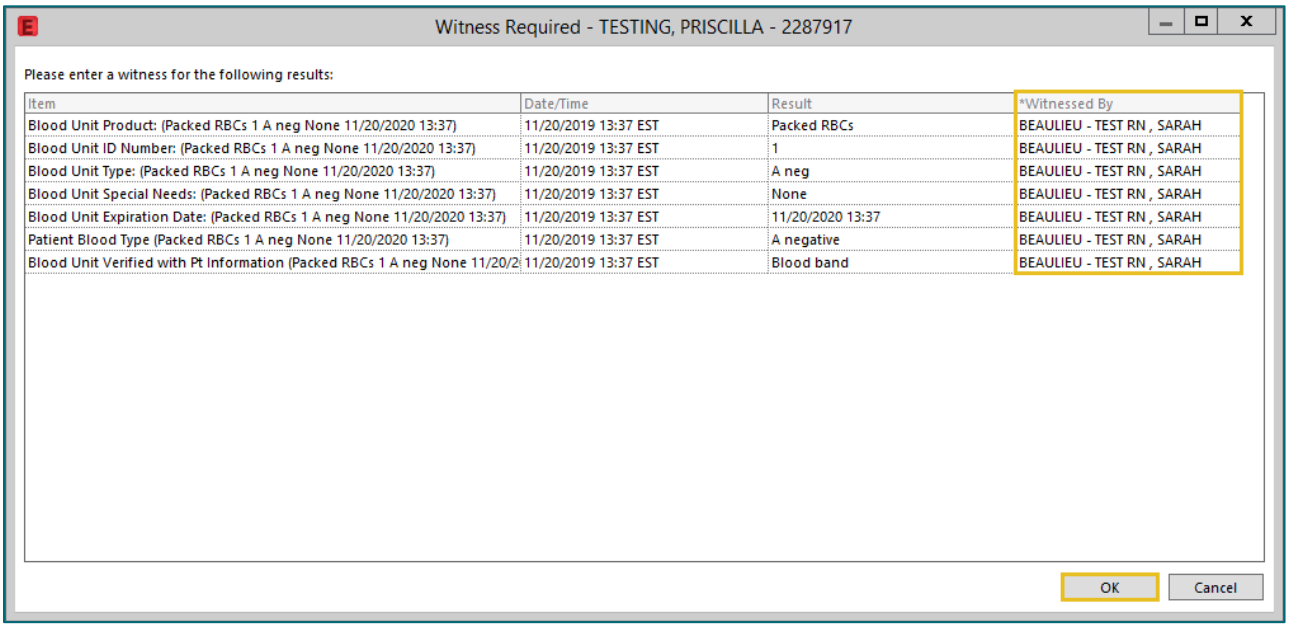

- When opening Interactive View and I&O, the Blood Product Administration navigator band will be located under the Intake and Output band.
- Vital Signs and Blood Product Transfusion documentation will be located within this band.

- Add a dynamic group in the Blood Product Transfusion section.

- A witness will be required when documenting results within the Blood Product Transfusion section.

NOTE: Customized navigator bands will be removed from all ED nurse positions to allow visibility of the Blood Product Administration band. Please take note of your customized navigator bands within Interactive View and I&O before December 3, 2019, as navigator bands will return to their original settings. Customization of these bands can occur after December 3rd.
