

During a patient’s transfusion, there are times vital signs need to be obtained, that are not part of the start and end transfusion process. These AdHoc vital signs can be entered by the nurse or the tech on the unit.

### AdHoc Vitals

- STEP 1:** Sign into Bridge.
- STEP 2:** Scan the patient’s wristband.
- STEP 3:** Select **Record Vital Signs**.
- STEP 4:** Record the patient’s Vital Signs, select **Continue**.
- STEP 5:** Select **Confirm**.
- If being obtained during a procedure, check the box to indicate and then select **Confirm**.

### Correcting Vitals

- STEP 1:** Select **Browse Vital Signs History**.
- STEP 2:** Select the pencil icon under the **Edit** column to open the vitals form.
- STEP 3:** Make needed corrections in the **Correct Vital Signs** view.
- STEP 4:** Select **Confirm**.

**NOTE:** Vitals entered in Cerner Bridge cross to Interactive View and I&O; however, vitals entered in Interactive View and I&O DO NOT cross into Cerner Bridge.
