**MyExperience is used by nurses who float between departments, such as the ED and specialty Inpatient areas, to change their Oracle Health (Cerner) position to have the correct electronic viewpoint and documentation.**

Finding the MyExperience Tool

The MyExperience tool is in the same toolbar as the CareCompass button.

If the MyExperience button is not viewable on the tool bar, it may appear in the dropdown of the tool bar containing the CareCompass button.

Using MyExperience

<u>My Available Positions</u>: Use to select position based on role.

<u>My Default Organizer View</u>: Use to select the desired view seen when signing into PowerChart.

STEP 1: Select **MyExperience** from the toolbar.

STEP 2: Select the department working in from the **My Available Positions** list.
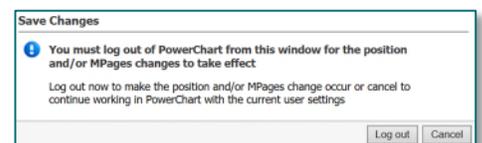

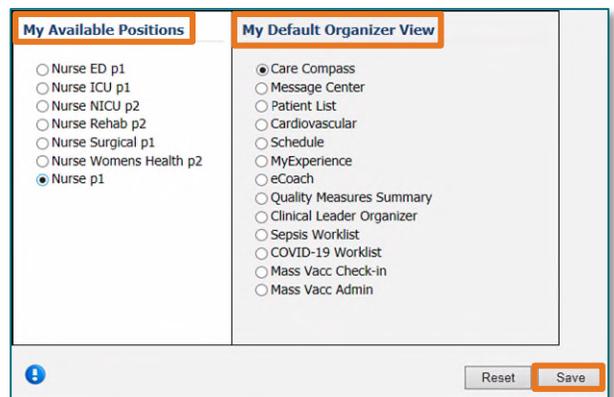

- **Nurse p1** position is used for inpatient nursing, which would include **Med/Surg** and **Pediatric** nursing units.

STEP 3: Change the default view within the **My Default Organizer View** list as needed.

STEP 4: Click **Save** to apply any changes made.

STEP 5: Log out and sign back in when prompted. If changing to the **Nurse ED p1** position, be sure to log into **FirstNet** for the correct view.

NOTE: **To ensure the changes are saved for the next PowerChart session, close out of PowerChart using the Exit button. When PowerChart is reopened, the selected view and/or MPage will default open.**
