
It is a Federal requirement to document an Inpatient Rehab patient has received two specific inpatient documents. To meet compliance, there is a documentation field on the Admission History Adult PowerForm in the Education Needs section.

Inpatient Rehab Forms

- Before performing an assessment using the inpatient rehabilitation facility assessment instrument, the rehabilitation facility must give the patient the following forms:
 1. Privacy Act Statement Health Care Record
 2. Data Collection Summary for Inpt Rehab

Documenting the forms have been given to the patient

- The patient does not need to sign these forms.
- It must be documented in the EHR (Electronic Health Record) the patient received the forms.
- To document, navigate to the **Admission History Adult PowerForm**, which is found in AdHoc or can be accessed on the MPage summary under the **Admission Documentation** component.
 1. Once on the PowerForm, click the **Education Needs** documentation section.
 2. At the bottom underneath **Inpatient Rehab Forms Given to Patient**, check the boxes indicating the patient received the forms.
 3. Once completed, click the green checkmark to sign the form.

The screenshot shows the 'Education Needs/ Learning Style' section of the Admission History Adult PowerForm. The 'Inpatient Rehab Forms Given to Patient' section is highlighted with an orange box. It contains two checkboxes: 'Privacy Act Statement Health Care Record' and 'Data Collection Summary for Inpt Rehab'. A red note next to the checkboxes reads 'Required for Inpatient Rehab Patients only'. The form also shows a date of '03/31/2022' and a time of '1052 EDT'.
