

A new Worklist feature has been added to PowerChart to assist in tracking and prioritizing the care of patients who have received a COVID-19 swab.

COVID-19 Worklist

- A COVID-19 Worklist is now available to **Inpatient** care positions and can be accessed from the toolbar. 
- The COVID-19 Worklist functions similarly to the **Clinical Leader Organizer** and **Provider Handoff** views, with the ability to customize columns, establish patient relationships and perform list maintenance.
- This worklist has several columns to assist in COVID-19 tracking and prioritization, including:
 - **Screening Orders:** Showing the presence of a COVID-19 swab order.
 - **Coronavirus Detection:** Showing the result of a COVID-19 swab, if applicable.
 - **Ventilator:** Indicating which patients are using ventilators.
- Like Care Compass, Provider Handoff, and the Clinical Leader Organizer, the COVID-19 Worklist displays the Patient Lists selected by the nurse/clinician.
