

The Task Timeline on the Neonate Workflow MPage displays in a table format of key tasks that should be completed prior to the time of discharge for the newborn. The information is beneficial to staff to aid in the ordering and completion of tasks.

## Task Timeline

### ➤ Key Tasks

- From the **Task Timeline**, key events, such as the administration of Vitamin K and Hepatitis B, can be viewed.

Task Timeline	
Date of birth: JAN 06, 2021 08:42	
Task	Result
<b>Pending</b>	
ID Band Documentation	--
Newborn Hepatitis B Vaccine	--
<b>Completed</b>	
Vitamin K Injection	Completed

## Documentation of Tasks

### ➤ Documentation in Mother's Chart.

- From Interactive View and I&O, documentation occurs in the **Newborn Delivery Data Band**.
- Newborn Vitamin K injection is documented in the **Newborn Exam** section. This is documented as **Done** or **Parents refused**.

Newborn Delivery Data

Newborn Discharge Checklist		
Footprints		Done
Hepatitis B Vaccine		Done
Birth Certificate	Done	
Newborn Car Seat Check	Done	
Newborn Cord Clamp Removed		Done
Newborn Separate Safe Sleep Environment		

### ➤ Result Copy

- It is recommended Result Copy is completed after the baby is registered and at the change of shift to capture documentation that occurred or labs that resulted since the last result copy was performed.
  - Access **Result Copy** from the toolbar in the mother's chart.
  - For more information on Result Copy, please see the [flyer](#).
