PowerChart Maternity Tracking Board Overview

April 1, 2021

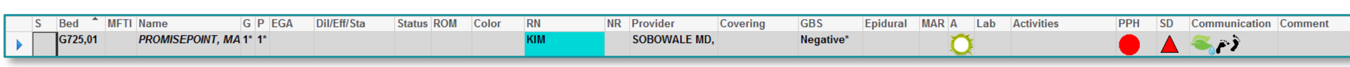
The Women's Health Tracking Board allows health care professionals to review patient and department information in one location.

Tracking Board Overview

The tracking board serves as the desktop for PowerChart Maternity, linking health care professionals to vital patient and department information in one location.

- There are various tabs based on the Member Organization.
- Tabs are for LDRP, Labor and Delivery, Newborn, Postpartum, Recently Discharged, and All Beds.
- There are multiple columns in each view that will provide up to date information regarding your patient.
- The Tracking Board toolbar sits below the tabs and provides easy access to commonly used PowerChart functions. The toolbar also provides access to the most used registration conversations, chart components, and PowerForms.
- The following elements are contained in the Tracking Board toolbar:
- Columns will vary slightly from board to board. The functionality of the columns will be the same.

Button	Action
	Pre Arrive Patient. Opens the Pre-Arrival window, allowing you to pre-arrive a patient to the system.
	OB Quick Reg. Opens the Person Search window. Use this window to find or add a patient.
	Newborn Registration. Allows you to select either **Newborn PreReg** or **Newborn Quick Reg**. Selecting either option opens a window that allows you to register the newborn.
	PM Conversations. Allows you to submit a Bed Transfer or discharge the patient.
	OB Patient History. Opens the patient's OB Patient History PowerForm.
	Women's Health View. Opens the patient's chart to the Women's Health view.
	Interactive View and I&O. Opens the Interactive View tab of the selected patient's chart.
	Depart Process. Opens the Depart Process dialog box, allowing you to manage the activities associated with the process of documenting and departing a patient in *PowerChart Maternity*. The window serves as a launch pad for depart-related applications, forms, conversations, and tracking events.
	Assign Provider. Assigns yourself to the selected patient based on the provider role you selected when checking in to the system. In the selected patient's row, the system displays your name in the appropriate Provider Roles column cell.
	Provider Check In. Checks a provider into the system.
	Discern Reports. Opens the Launch Report window.
	Patient Summary Report. Opens the Patient Summary Report window.



- Status: Room and Patient Status (Assigned, Unassigned, Hold, Dirty, Housekeeping Clean, etc.).

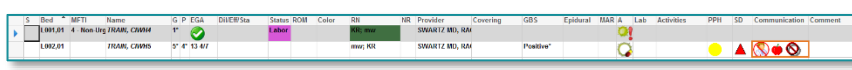
- Communication
  - In the communication column, icons are displayed based on events.
  - Events are selected from the toolbar and include:
    - Car Seat Check
    - Discharge
    - Fetal/Neo Demise
    - Multiples
    - Neo Provider Needed
    - No Visitors
    - Rubella
    - Baby in NICU
    - To select an event, click the clock icon and select **Request Event.**

  - Comment is a freetext field that nursing and/or providers can type in.
  - Communication events also populate with the documentation of risk factors. For example, Gestational Diabetes and Late Prenatal Care.
- Opening a Patient Chart
  - To open the patient chart from the Tracking Board, select the row of the patient whose chart you want to open and double-click the blue arrow in the first column.

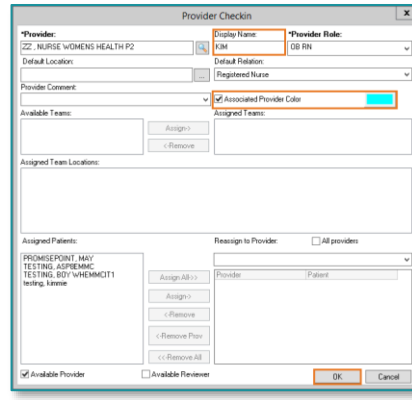


- Accessing the Tracking Board
  - When you are in a patient chart, to return to the tracking board, click the Tracking Board icon in the toolbar.

➢ Checking in and Assigning Yourself

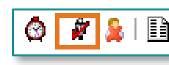
- From the toolbar, there is an icon of a person you will select to assign yourself to patients. This will aid in other staff members knowing who is taking care of which patients.

- Click the icon with the green check-mark, you can create a color for yourself and you can enter the display name that you want to show indicating that you are the one that is taking care of the patient. This can be your initials or your first name.

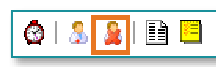


- After you set your information in this box, and you have selected OK, you will be ready to assign yourself to patients.
- The icon will now display with a "X" for you to check out.

- To assign yourself, click the RN column of the patient that you are assuming care of and click the icon of the person.
- Your name will now display in the RN column.
- If you need to unassign yourself, highlight the patient row of the patient that you will not be caring for any longer, click the icon with the red check. Your name will no longer display as the nurse taking care of that patient.



- At the end of the shift, or at times when someone else is assuming the care of the patient, you will sign out.
- To sign out, click the icon with the X. You will see a pop-up box that you will confirm that you are checking out, click **OK**.



- The icon will now display with the green checkmark.

➢ **Documenting in the Patient Record**

- Find your patient on the tracking board and double-click the blue arrow in the first column.
  - Address any alerts that you may have.
- Your chart will open in the Women's Health View.
- You will see several View Points or MPages.
- Each of these pages are designed with components that can be moved to your personal preferences. They are also geared to the various stages of the patient's visit.
- Pages are: Triage/Ante/Labor, Partogram, Postpartum, Blood Loss Calculator, Discharge, Neonate Workflow, Admission, and Handoff.
