

## From the Office of Clinical Informatics Women's Health View Related Records

March 30, 2021

Related records allows staff to navigate between the newborn and maternal chart by clicking the Related Records button in the toolbar.

## **Related Records**

The use of **Related Records** will allow you to efficiently navigate between the newborn and maternal chart with the click of one icon.

## Related Records

- From the mother's chart, go to the toolbar and select **Related Records**.
- The newborn chart will open.
- If you have more than one chart open prior to selecting related records, you will receive a message to close one of the charts.

• If the mother has more than one baby, you will need to select the record of the baby you are wanting to view.

• You can also open the mother's chart from the newborn chart.

NOTE: This functionality works once the baby is registered and the mother and baby are linked in the registration process.
