Documentation of antenatal testing in the acute setting is a joint effort between nursing and the provider. The documentation of these clinical events helps provide a complete medical record for the patient.

Acute Nursing

STEP 1: Associate the patient to her fetal monitor.

STEP 2: Pull in, verify, and sign off vital signs in iView (Antenatal Testing).

STEP 3: Add annotations to fetal strip as appropriate.

STEP 4: Open Antenatal Testing Dynamic Documentation Note. Complete appropriate Antenatal testing documentation.

STEP 5: Save the Antenatal Testing Note and send to the provider for endorsement.

- From the List tab in Documentation, locate the **OB Antenatal Testing** Note and highlight the note.
    - Select **Forward** and enter the provider name to sign the note.

STEP 6: Notify provider of results.

NOTE: Proceed with admission or discharge workflows based on provider response.

Acute Provider

STEP 1: Review Antenatal Testing Note in Message Center and launch FetaLink to review strip.

STEP 2: Document assessment in Antenatal Testing Note and sign.

STEP 3: Enter Admission order or discharge order as appropriate.
