

The MAR and the Med Administration Wizard use the following icons to communicate important medication administration information to nursing staff.

MAR & Med Administration Wizard Icons

Admin Note – Indicates there is a nurse-to-nurse communication attached to the order. Opens the Admin Note window where the note can be viewed and cleared if desired.

Hard Stop Renewal - Hard-stop orders discontinue after they reach their stop date/time.

Soft Stop Renewal – Orders that reach their soft stop need to be renewed or discontinued. The difference between a hard stop and a soft stop is that soft-stop orders are not discontinued automatically.

Immediate Priority – The icon is displayed when there is a task that has a priority of STAT and NOW.

Infusion Billing – Indicates infusion documentation needs to be completed for an administration for the order.

Nurse Review – Indicates nurse review of the order is required.

Order Modification – Order modifications for scheduled medication orders are displayed with a yellow delta icon above the first dose to be administered after the date and time of the order modification.

Overdue – A preference set by the system administer determines if the icon is displayed. If set to display, it does so only if all of the following conditions are met: 1) the order has passed its stop date and time; 2) it is not a soft-stop order; and 3) the order is either in a Pending Complete status or it is not in one of the following statuses: Completed, Discontinued, Canceled, Voided With Results, or Voided Without Results.

From the Office of Health Informatics MAR & Med Administration Wizard Icons May 13, 2025 Page 2 of 2

Pending Complete – A continuing order has reached its defined stop date and time, but still has tasks that have not been completed.

Pharmacy Comment – Indicates there is a pharmacy comment attached to the order. Opens the Order Information For <medication name> window with the Comments tab active.

PowerPlan – The icon displays when the task is associated to an order that was generated as part of a PowerPlan.

Rejected by Pharmacy – The order has been rejected by pharmacy. Check all order information before administering. (This also produces rejected tasks.)

Request Pharmacy Verification – The medication order has not been verified by pharmacy.

Missing Required Details – Medication order cannot be signed until all required details are completed.

For questions regarding process and/or policies, please contact your unit's Clinical Educator or Health Informaticist. For any other questions please contact the Customer Support Center at: 207-973-7728 or 1-888-827-7728.
