

Pharmacy Antimicrobial Stewardship Program (ASP) Escalation Culture alerts fire when a positive culture results and a current anti-infective has no susceptibility results for that culture.

Escalation Culture Alerts

This alert rule will fire in the Clinical Surveillance Worklist when a patient has a positive culture results and the current anti-infective has no susceptibility results for that culture.

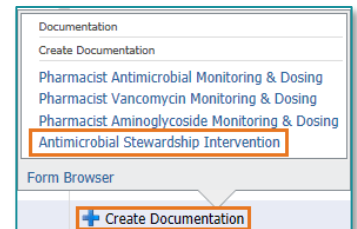

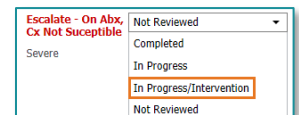

➤ Review data triggering the alert in the Clinical Surveillance Worklist.

- Click into the Alert column.
 - The “Escalate – On Abx, Cx Not Susceptible” alert is seen.
 - Click the Microbiology Details hyperlink to review all pertinent cultures within the patient chart.
- Review detailed patient information.

➤ True Actionable Alert

- Move alert to In Progress/Intervention in the status drop-down.
 - Staff may select In Progress, complete the intervention form, then return to update status to In Progress/Intervention or Completed/Intervention depending on site workflows.
- After review of the documentation click the Blue plus sign within the documentation column.
 - Select the Antimicrobial Stewardship Intervention form.

Antimicrobial Stewardship Intervention Form Documentation

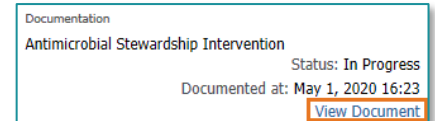

- STEP 1:** Choose applicable intervention type in Recommendation section.
- STEP 2:** In the Prescribed Drug and Proposed Drug section, select Antibiotic (free text) option to activate Generic Drug window and enter appropriate medication names.
- STEP 3:** Choose appropriate option in the Infection Source section.
- STEP 4:** Enter Prescriber Name.

STEP 5: Choose the applicable ASP Provider Service, Prescriber Response and form of Contact.

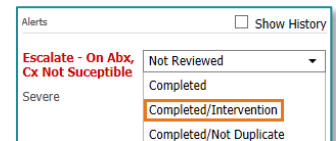

STEP 6: Briefly describe the intervention in the Comment section.

STEP 7: Click the green check if document is complete.   

NOTE: This document may be saved at any time during charting with the floppy disk icon. To adjust or add to a saved note access it through the form browser or through the hyperlink in the documentation column. Once on form browser, highlight the note, right-click in the body of the note and Modify.

STEP 8: Finalize by clicking into the Alert column and change the alert status to Completed/Intervention.

➤ **Not a True Actionable Alert**

- Move alert to **In Progress** in the status drop-down.
- Click the Blue plus sign within the documentation column.
 - Select the **Antimicrobial Stewardship Intervention** form.
 - Select **Other** in the **Recommendations** box and enter “*False Alert*”.
 - Provide brief description in the **Comment** section at the bottom of ASP form and click the green checkmark to complete.
- Click into the Alert column and change the alert to **Dismissed**.
 - Enter applicable time frame for alert dismissal.
