

Inpatient Pharmacists play an important role in ensuring smooth transitions of care while patients are discharged from the hospital. This flyer outlines a new process for selective notification of the Pharmacist upon patient discharge order placement.

Option in Pharmacy PowerForms

A **Notify pharmacy when Discharged** field will be added to the PowerForms below to prompt twofold notification to the pharmacist when an electronic **Discharge Order** is entered.

➤ **PowerForms affected:**

- Dofetilide (Tikosyn) QTc Monitoring
- Sotalol QTc Documentation
- Pharmacist Anticoag DOAC TDM
- Pharmacist Anticoag Warfarin TDM/PTD
- Pharmacy Consult Rounding Form
- Pharmacy Consult General Form
- Pharmacy Patient Education Form

Patient Discharge Notifications

When the field’s radio button has been selected in any of the above PowerForms and a **Discharge Order** has been entered, the following will occur...

➤ **Med Manager: Patient Discharge Ordered – Communication Order**

NOTE: Order Comments will contain the name of the PowerForm used to initiate the notification. The PowerForm should contain details about why the notification was requested. If **Notify pharmacy when Discharge** was selected on multiple forms, the last charted PowerForm will be listed.

➤ **Multi-Patient Task List: Pharmacy Consult – Patient Discharge**

When the Pharmacy Consult is finished, chart **Done** to complete the task.

4G4CA / G407 / 02	TEST, VERDE 01/01/1990	2440006	02/28/2023 12:16 EST	Pharmacy Consult - Patient Discharge
-------------------	---------------------------	---------	----------------------	--------------------------------------

IMPORTANT: Once **Notify pharmacy when Discharged** is selected and the PowerForm is signed, the discharge notifications will fire even if button is deselected on subsequent PowerForms.
