

The Physical Therapy Evaluation, Daily Documentation, Progress Note, and Discharge Summary forms in the Acute Adhoc folder have been replaced with Acute forms. Previously they were a copy of the Inpatient Rehab Facility (IRF) forms with Acute at the end of the name. The implementation of the Acute forms alleviates the printing issue with the IRF forms displaying more information than necessary.

Adhoc Folder Structure

- The Acute folder is in first place allowing it to default open.
