
This flyer will outline the new workflow for the Physical, and Occupational Therapist who perform Lymphedema treatment.

Workflow for PT and OT Performing Lymphedema Treatment

- The patient has been checked into the Outpatient Rehab Clinic.
 - Checking the patient in for the first or subsequent visit will fire the documentation task for the visit to the **Multi-patient Task List (MPTL)**.
- From the **MPTL**, the therapist will locate the patient and double-click the task to open the documentation form.
 - Evaluation, Certification Letter, Daily Notes, and Progress Notes will be tasked to the MPTL.

NOTE: Documentation of charges occurs within the Evaluation, Daily Note, Progress Note, and Discharge Summary forms.

AdHoc Folder Structure

- Each Therapy discipline will only see their own Note types in AdHoc.

Documenting a Task from the MPTL

- Double click the desired task to open the documentation form.
- If all the required documentation fields have been completed, the task on the MPTL will have a green check mark and have a status of **Complete**.

- Refresh the MPTL by clicking the **minutes ago** button to remove the task from the MPTL.
- Forms that do not have all required fields documented will go to the MPTL with a status of **In-Process**.
 - Clicking an **In-Process** task will open the previously started form.

Evaluation Forms

- Double-click the **Evaluation** task in the MPTL to document the Evaluation form.
- Document the required fields and those sections that are applicable to the patient.
- Documenting **Evaluation Complete** in the **Plan** section will fire a **Cert Send** task to the MPTL if the patient has **Medicare Insurance**.

NOTE: If the Patient requires a Certification and does not have Medicare Insurance, the therapist will access the Certification Letter from the Outpatient Therapy folder in AdHoc.

NOTE: DO NOT open the Lymphedema Measurements or the Wound section before the measurements or wound is documented in Interactive View and I & O (iView). This documentation comes into the form in a template. The templates will not pull in data if the sections for Lymphedema Measurements or Wound are not first documented in iView.

- Document the required fields and those sections that are applicable to the patient.
- In the **Assessment** section, **Evaluation Complexity** will populate **Low, Moderate, or High Complexity** based on documentation in the **Evaluation**.
 - Documentation fields that contribute to the calculation are:
 - **Examination of Body Systems** – documented in the **Assessment** section by PT.
 - **Therapy Evaluation of Assessment** – documented in the **Assessment** section by OT.
 - **Clinical Decision Making** – located in the **Assessment** section.
 - **History of Comorbidities/Personal Factors Impacting Plan of Care** – located in the **Past Medical History, Problems, and Diagnosis** section.
 - **Presentation of Characteristics** – located in the **General Information** section.
 - OT does not have this documentation field.
 - If the **Evaluation Complexity** calculation differs from what the therapist has documented, the therapist should review the documentation fields that contribute to the calculation and adjust as needed.
- **Documenting a Problem**
 - Locate and open the **Past Medical History, Problems, and Diagnosis** section.
 - Use the **IMO search** field for entering a **new Problem**.
 - Right-click the newly added Problem to add details such as **Age** or **Date of Onset**.
 - Click + **Add** to search for Problems that do not come up in IMO Search.
 - Problems should be added if the problem for which the patient is being seen for is not on the **Problem list**, and when the patient reports a new problem.

NOTE: Therapists do NOT add a Problem under **Diagnosis (Problem)** being Addressed this Visit.

- **Pain Assessment**
 - Pain Assessment is documented on each visit.
 - **Pain Assessment Detail** section is used to document additional information on how the pain is affecting the patient.
 - **Coordination of Care**
 - Use this section to document who the patient's care was coordinated with.
 - **Time Spent with Patient**
-

- Refer to the [Rehab Therapy Charge](#) flyer for detailed information on documenting charges for specific organizations.

➤ **Additional Information**

- Document in this free text box information that does not have a discrete documentation field.
- Click the **SAVE disc icon** to save the **Evaluation** form.
- Close the **AdHoc** Charting window.
- Navigate to **Interactive View and I&O** in the **Menu** (Table of Contents).

Documenting Lymphedema Measurements

Key information about documenting Lymphedema Measurements will be listed here.

- Click **Interactive View and I&O** on the **Menu**.
- Locate and click the **Lymphedema iView** band.
- Select the applicable Lymphedema site for documentation.

NOTE: There are subsections for **Unaffected Baseline Measurements**, and **Affected Baseline Measurements**. Be careful to document the measurements in the correct section.

- **Measurement Interval** must be documented in order for the **Volume Calculations** to work.
- Document the **Laterality** and the measured **Circumference** at the designated measurement Interval.
- The first measurement will be **A** and the measurements will proceed up the alphabet.
 - **Volumes** will be **A to B**, **B to C**, **C to D**, etc. A **Total Volume** will also be calculated.
- iView documentation is signed by clicking the **green sign icon**.

Documenting Wounds

Wound documentation takes place in the **Rehab Wound View** iView band.

➤ **Incision/Wound/Skin Dynamic Group**

- Click the **Incision/Wound/Skin** dynamic group grid to open the label.
- The **Label** is where the wound location is documented.
- Each wound requires its own **Incision/Wound/Skin** dynamic group.
- In **Abnormality Type**, select the type of wound.
- Documentation fields will open based on the selection in **Abnormality Type**.
- If a wound is healed, **Inactivate the dynamic group** by right clicking the label and select **Inactivate**. The documentation fields will turn gray, and documentation cannot occur within that dynamic group.
- iView documentation is signed by clicking the **green sign icon**.

- Now that the iView documentation is complete, the information needs to be pulled into the saved form.

Completing Saved Form

- Locate the form that has been saved.
 - In the **Multi-Patient Task List**, double click the task to open the saved form.
- OR
- In **Form Browser**, right click and select **Modify**. The saved form opens.

NOTE: The saved form can also be accessed from the **Rehabilitation Organizer Activities** column.

- Click in the **Lymphedema Measurements** section to pull in documentation from iView. Documentation from iView displays in the template.
- Click in the **Wound** section to pull in documentation from iView. Documentation from the dynamic group displays in the template.
- Sign the form by clicking the green sign icon.
- **Refresh** the Multi-Patient Task List.

Changing iView Documentation Time

- If documentation is not completed at the time of the assessment, right-click in the **Time EDT box** and select **Insert Date/Time**. This will ensure the documentation reflects the actual time the assessment occurred.
- Enter the appropriate **Date and Time**. A new documentation column will open.

Daily Note Forms

NOTE: If the patient receives treatment on the day of the Evaluation, the therapist should complete the Evaluation and a Daily Note.

- Double-click the **Daily Documentation Note** task in the MPTL to document the **Lymphedema Daily Documentation** form.
- Document the required fields and those sections that are applicable to the patient.

NOTE: Certain documentation from the Evaluation form will pull forward to the Daily Note. Click in the documented sections to pull in data from the Evaluation.

Progress Note Forms

- **On the 8th visit**, on chart open, the therapist will receive a pop-up **Discern Alert** reminding the therapist that a **Progress Note** is due on the 10th visit.
 - **On the 9th visit**, on chart open, the therapist will receive a pop-up **Discern Alert** reminding the patient that the **Progress Note** is due on the 10th visit.
 - The **Progress Note** task will go to the MPTL on the 9th visit.
-

- On the 10th visit, if the Progress Note has not been completed, on chart open, the therapist will receive a pop-up Discern Alert stating the Progress Note is due immediately. This alert will continue to fire until the Progress Note is completed.

Discern Notification Message

Subject: TEST, CIREHAB1
Priority Status: High Priority Value: 80
Event Date/Time: 02/20/2020 09:16:54
Message class/subclass: APPLICATION/DISCERN

DISCERN ALERT

NAME: TEST, CIREHAB1
DATE: February 20, 2020 09:16:54 EST
MRN: 1700139
BIRTH DATE: September 02, 1951
AGE: 68 Years
LOCATION: EMMC, MRTO;

Patient has completed 8 of 10 visits, Progress Note is due on the 10th visit.

Discern Notification Message

Subject: TEST, CIREHAB1
Priority Status: High Priority Value: 80
Event Date/Time: 02/20/2020 09:21:09
Message class/subclass: APPLICATION/DISCERN

DISCERN ALERT

NAME: TEST, CIREHAB1
DATE: February 20, 2020 09:21:09 EST
MRN: 1700139
BIRTH DATE: September 02, 1951
AGE: 68 Years
LOCATION: EMMC, MRTO;

Patient has completed 9 of 10 visits, Progress Note Task has been added to the task list.

Discern Notification Message

Subject: TEST, CIREHAB1
Priority Status: High Priority Value: 80
Event Date/Time: 02/20/2020 09:28:35
Message class/subclass: APPLICATION/DISCERN

DISCERN ALERT

NAME: TEST, CIREHAB1
DATE: February 20, 2020 09:28:35 EST
MRN: 1700139
BIRTH DATE: September 02, 1951
AGE: 68 Years
LOCATION: EMMC, MRTO;

Patient has exceeded 10 visits. Progress Note must be completed immediately.

- In the **Assessment** section, document **Progress Note Complete**.
 - Documenting the Progress Note is complete, resets the counter so alerts will fire for the next Progress Note.

Documenting Cancelled/Missed Units

- If the patient arrives late, is too fatigued to continue the treatment, or misses part of their therapy session due to another reason, the number of **Missed Units** and the **Reason** are documented at the bottom of the **Time Spent with Patient** section located in each of the documentation forms.
- If the patient misses an entire therapy session, document in the **Missed Therapy Minutes** form for your discipline located in **AdHoc**.

Discharge Summary Forms

- The Discharge Summary forms are NOT tasked to the MPTL.
- On the patients last visit, the therapist will access the **Discharge Summary** form from the **Outpatient Therapy** or **IRF Therapy** folder in **AdHoc**.
- Documentation from the **Lymphedema Daily Note** and **Lymphedema Progress Note** will pull forward to the **Discharge Summary** form.
 - Click in each previously documented sections to pull data forward into the Discharge Summary.
- If the patient is **discharged from therapy** because they have stopped coming, or have exceeded the number of missed sessions allowed, the **Discharge Summary** form should be documented based on the last visit.
 - The therapist would indicate the number of **Missed Units** in the **Cancelled/Missed Time** subsection of **Time Spent with Patient**.

NOTE: Any form that does not have all required fields documented will fire a task to the MPTL. These tasks will be found on the **Physical** and **Occupational Tx** tab

Student Documentation

- After a student therapist completes a documentation form, the licensed therapist will get a task on the MPTL for the form with a Status of **Pending Validation**.
- The student documentation forms will display in **Form Browser** with a status of **(In-Process)**.
- The licensed therapist will double-click the task to open the student's documentation.
- The documentation should be reviewed. The therapist is required to document something in the note in order to sign the form.
- After the licensed therapist signs the form, in **Form Browser** the status of the form will display as **(Auth (Verified))**.

Saving a Note

- If a therapist is working on a documentation form and is not able to complete it in one sitting, the form should be **Saved** rather than signed.
- Click the **Save Disc icon** next to the Sign icon.
- If the saved note has **required fields that have not been documented** yet, navigate to the MPTL and click the task to open the previously started note.
 - In **Form Browser**, this note would have a **red tile** and have a status of **(In-Progress)**.
- To complete a saved note that had **all required fields documented**, navigate to **Form Browser** and locate the saved form.
 - In **Form Browser**, this note would have a **blue tile** and a status of **(In-Progress)**.
 - Right-click the form and select **Modify form**.
 - Once the form is completed, click the **Sign icon**.
 - The status in **Form Browser** will update to **(Auth (Verified))**.
