

---

**Users without ordering privileges will be prompted to enter a supervising provider in the Ordering Physician window before submitting an order or prescription.**

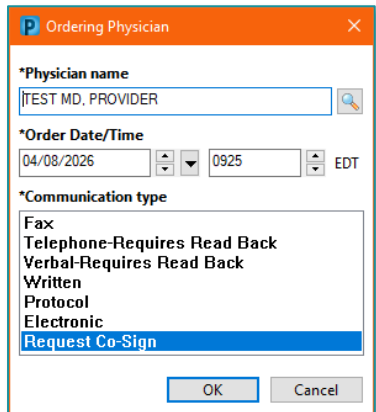

---

## Ordering Physician Window

Residents, visiting clinicians, and providers from external groups who do not have ordering privileges will be prompted with the Ordering Physician window when attempting to place orders or prescriptions. When this occurs, the name of the supervising provider must be entered before the order can be submitted.

- Begin by placing an order or prescription for the patient as usual.
- If the Ordering Physician Window appears, this will indicate a lack of ordering privileges.
- Enter the attending or supervising provider's name within the Physician name Ordering Physician window.
- Select Request Co-Sign and click OK.

**NOTE:** NL EMMC and NL Acadia Residents are fully credentialed to place orders and prescriptions.

## Subsequent Ordering

- The Ordering Physician window will appear for any subsequent orders placed.

**NOTE:** Providers who feel they are receiving the Ordering Physician window notification in error, are advised to place a help desk ticket immediately.
