

The Discharge MPage is designed to guide providers through the patient discharge workflow. To successfully complete the documentation, all required fields must be addressed indicated by a red asterisk. This guide provides a detailed overview of the necessary steps and required information.

Discharge MPage Documentation Workflow

Required components are indicated by a red asterisk. As required documentation is completed, the red asterisk becomes a green checkmark.

➤ Problems List

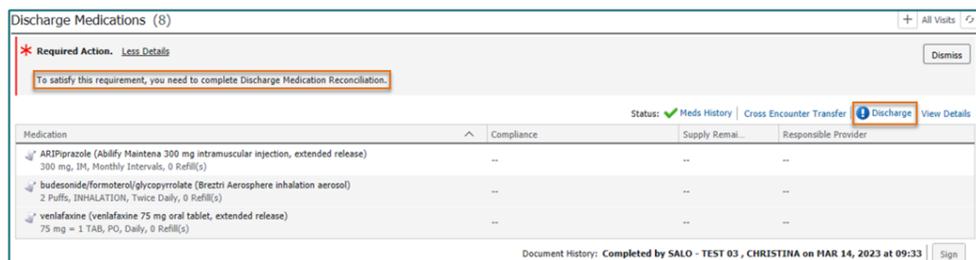

- Review and updated the Problems List component as appropriate.
- At least one **This Visit** problem must be selected to meet the requirement.

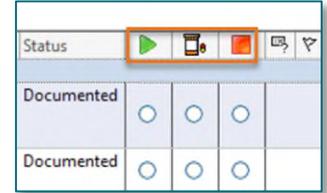

NOTE: If the patient does not have any Chronic Problems, click No Chronic Problems.

➤ Discharge Medications

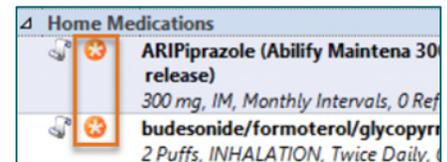

- To satisfy this requirement, complete the **Discharge Medication Reconciliation**.
- Click the blue hyperlink labeled **Discharge** to open the medication reconciliation window.

- Select **Continue After Reconciliation, Create New Rx**, or **Do Not Continue After Reconciliation** for each medication.
- Select **Do Not Continue Inpatient PRN Meds** to discontinue inpatient PRN medications.
- Select **Continue Remaining Home Meds** for medications managed by other prescribing providers.

- All medications with an **orange starburst** need to be addressed.
- When completed, select **Reconcile and Sign**.

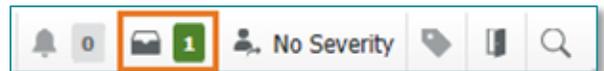

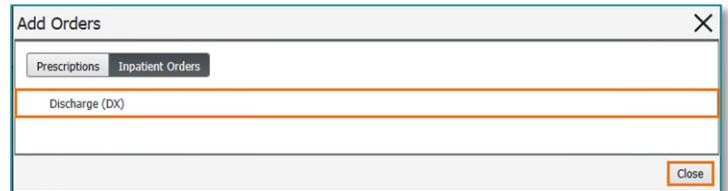

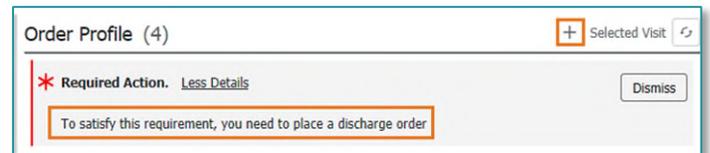

- A green checkmark appears when medication reconciliation has been completed.

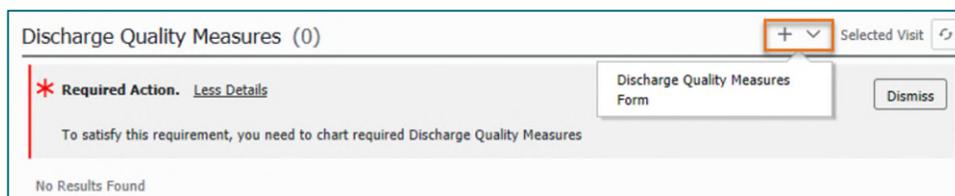

➤ **Order Profile**

- A **discharge order** must be placed using the **Orders Profile** component.
- Click the **+** and select **Discharge (DX)**.
- Click **Close**.
- Select **Orders for Signature**.
 - Complete required fields within the order.
 - Click **Sign**.

➤ **Discharge Quality Measures**

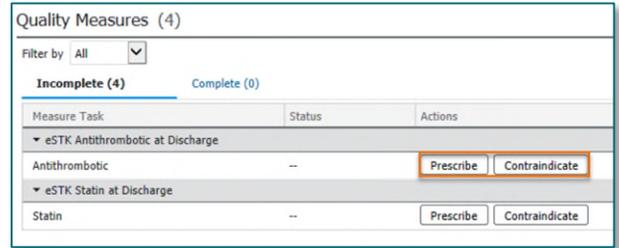

- Completion of the **Discharge Quality Measures** form indicates if the patient was treated for a diagnosis that meets quality measures.

- Open the form by clicking the caret next to the **+**, then complete the form as applicable.

➤ **Quality Measures**

- This component contains items that meet eCQM measures, if applicable.
- If there is an item that needs to be addressed, it is indicated in the **Incomplete** tab of the Measure.
 - To complete the item, select **Prescribe** or **Contraindicate** as it applies.
 - Items that have been completed, are displayed in the **Complete** tab.

NOTE: Items only populate in the Quality Measures component after the Discharge Quality Measures Form has been completed.

➤ **Follow Up**

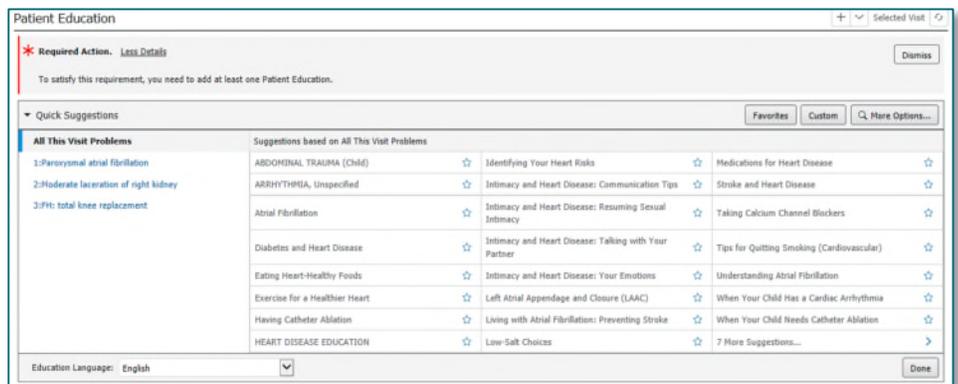

- At least **one** Follow Up item must be added to satisfy this requirement.
- From the quick picks, a follow up appointment is selected.
 - Providers can use the search option located to the top right of the **Follow Up** component for additional options.

NOTE: Nursing staff may complete this component.

➤ **Patient Education**

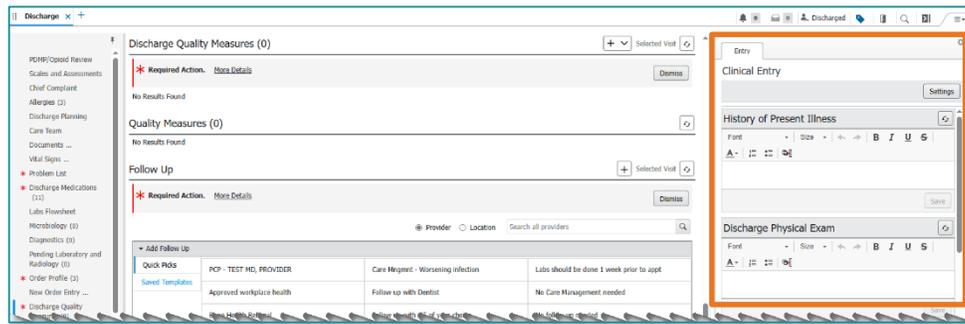

- At least **one** patient education topic must be selected based on the This Visit problem(s) in the **Problems List**.
- Additional topics may be selected and can be completed by the provider or nursing staff.
- Highlight the education topic(s) desired by clicking once within the cell of the education piece and when complete, select **Done**.

NOTE: Clicking a piece of education multiple times will add duplicate patient education items.

➤ **Dynamic Documentation**

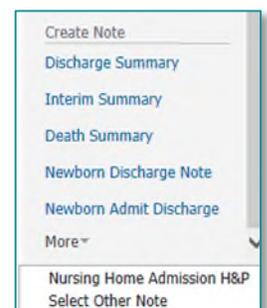

- Components for your dynamic documentation note are found within the **Clinical Entry Workspace** pane on the right of the screen.

- These include **History of Present Illness, Discharge Physical Exam, Hospital Course, Follow Up Recommendations, Patient Instructions, and Wound Care Instructions.**
- These can be added via auto text, free text, or using voice recognition.

NOTE: Information documented in some of these components flow to other locations for staff and patient review.

- In the **Create Note** section, there are multiple Dynamic Documentation Note templates available to select from:
 - Discharge Summary
 - Interim Summary
 - Death Summary
 - Newborn Discharge Note
 - Newborn Admit Discharge
 - Nursing Home Admission H&P

NOTE: If the desired note type is not listed face up, click the **More** button and click **Select Other Note** to choose a different note type.

➤ **Additional Components**

- Additional Components that are available for review:
 - Allergies
 - Calculators
 - Care Team
 - Chief Complaint
 - Clinical Charge Entry
 - Controlled Substances
 - Diagnostics
 - Discharge Planning
 - Documents
 - Goals and Interventions
 - Health Concerns
 - Labs Flowsheet
 - Media Gallery
 - Microbiology
 - Pending Laboratory and Radiology
 - Risk Indicators
 - Vital Signs

NOTE: These components are available for adding or removing from view via the 3-line menu  and the order can be rearranged at any time by holding the left mouse button down and dragging and dropping the component into the desired order.
