

There has been a high incidence of ePrescribing failures regarding the use of the “Earliest Fill Date” field for Schedule III to V drugs. Cerner is working on a solution, but in the meantime to reduce these failures, please use the following process.

Error Message Regarding Earliest Fill Date

When **Earliest Fill Date** is entered on Scheduled III to V drugs, the system can reject the prescription with the error: **FSI: Failed to verify digital signature**. When this occurs, all rejected ePrescriptions will flow to Message Center.

Recommended Workflow

Instead of using the **Earliest Fill Date**, please enter it in **Note to Pharmacy** or **Special Instructions**.
