

The Chronological View MPage provides a single area of the chart to view pertinent information from the patient's encounter. Clinicians can use Chronological View for reviewing patient records during patient handoff and quality assurance. The clinical information displayed in the milestone sections includes tracking events, vital signs, orders, patient movement, and documentation in chronological sequence.

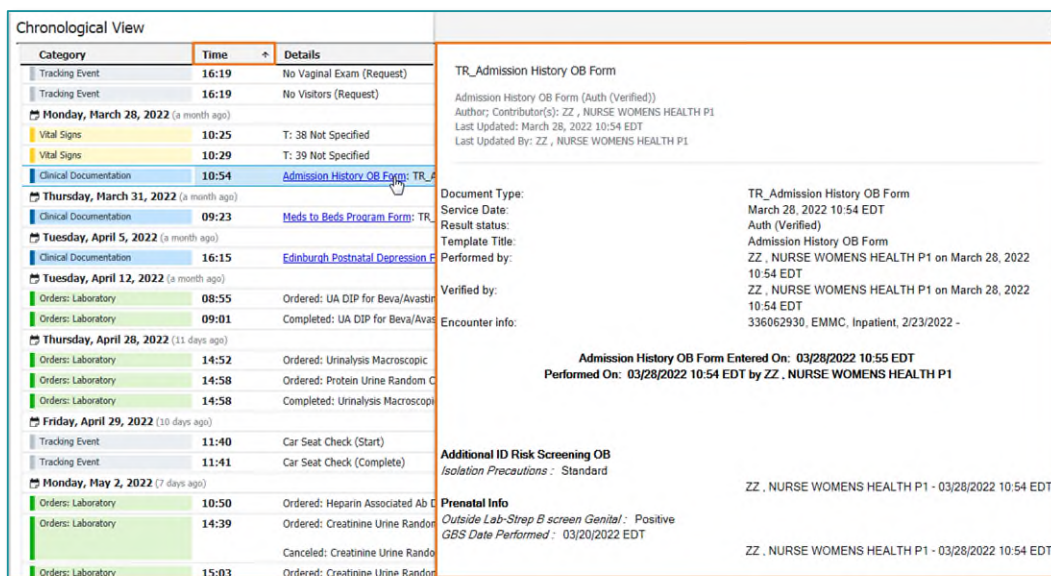

Adding Chronological View MPage

- **Add View:** Allows the ability of adding Chronological View to the new ViewPoint.
- Select **Chronological View** under **Select a View**.

Features of Chronological View MPage

Chronological View provides a comprehensive view of the patient's encounter.

Category	Time	Details
