

The C Diff Vancomycin Taper PowerPlan is designed to increase the efficiency in managing the Vancomycin regimen. The PowerPlan reduces the need to place individual Vancomycin orders and determining the administration frequencies over the course of treatment, which may include post-discharge.

Ordering the C Diff Vancomycin Taper PowerPlan

Type C Diff Vancomycin Taper in the search window of the *Inpatient* order entry catalog.

- The PowerPlan is built with six sequenced stages of pre-selected Vancomycin orders.

Converting the C Diff Vancomycin to RX

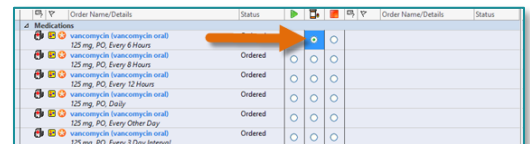

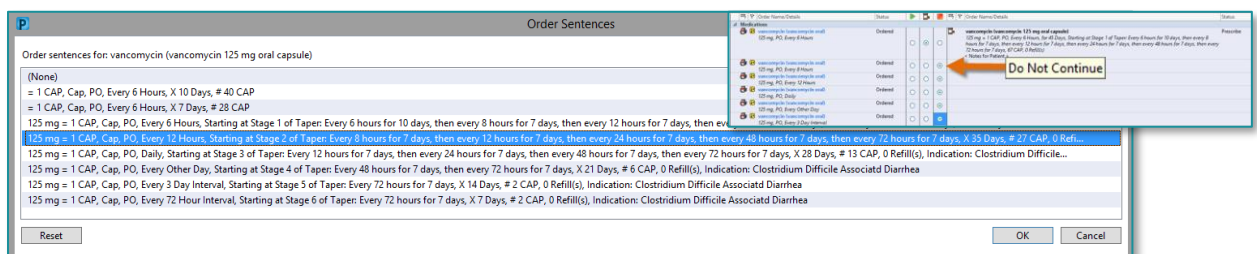

A Vancomycin taper order within the PowerPlan can be converted to a prescription at the time of the patient discharge if continuation of treatment is needed.

STEP 1: Select the current active Vancomycin dose to convert to a NEW RX.

STEP 2: The Convert to Prescription wizard opens.

- Double-click Vancomycin 125mg oral capsule from the Possible Conversion table.

STEP 3: Select the order sentence that matches the Vancomycin order you selected in Step 1 and click OK.

STEP 4: Do Not Continue the remaining Vancomycin orders

- Address the remaining medication orders.
- Select Reconcile and Sign.
