

Documentation within the Women's Health View will cross the ambulatory and inpatient settings, improving the continuity of care for the OB patient throughout her pregnancy. This will allow for efficiency in delivering high quality health care, to provide members of the healthcare team to have access to this information. Provider documentation has portions that will occur within Interactive View and I&O.

### Interactive View and I&O

➤ Interactive View and I&O allows for charting multiple results in one location that can be viewed based on a selected timeframe. Women's Health has several bands that are performed by nursing and by the providers.

#### ➤ OB Office Visit

- Documentation in this band will be entered by nursing and providers.
- Information from the nursing intake and from the pregnancy visit information will populate in this band.
- Provider documentation to occur directly in this band is the **Fetal Status (OB/GYN)**.

	06/01/2021 9:37 EDT	05/28/2021 10:10 EDT
Baby A		
Fetal Presentation:		
Fetal Activity		
FHR Monitoring Method		
FHR	BPM	
FHR Baseline	BPM	
NST Interpretation:		

**NOTE:** Documentation from the pregnancy card will display in the Prenatal Information section.

#### ➤ Antenatal Testing

- Documentation will display from FetaLink and nursing documentation in this band.
- Elements to be documented by the provider include:
  - Cervical Exam
  - Membrane Status Information
  - Non-Stress Test Interpretation

#### ➤ Provider Delivery Documentation

- Details surrounding the delivery of the newborn will occur in this band.
