Northern Light Health℠

PowerNotes will retire on Monday, September 25, 2023 for all Women's Health providers. Women's Health providers are encouraged to transition to Dynamic Documentation, as soon as possible. Instructions for requesting education on the use of the dynamic documentation tool is available.

Dynamic Documentation Education Opportunities

Dynamic Documentation education is available through an online simulation-based course and/or through instructor-led classes. Use the Self-Service Portal to request education. (Click here for direct access to the Education Request form.) When completing the request, indicate whether classroom, simulation, or both are desired. Also, indicate if M*Modal Fluency Direct education is needed.

➢ **Dynamic Documentation Instructor-Led Classes**

Classes are offered weekly (weekdays and frequency vary from site to site based on classroom availability). For interested parties, the classes are offered with M*Modal Fluency Direct voice-to-text education.

➢ **Online Simulation-Based Courses**

Online education can be used in place of or in addition to classroom education. This modality allows the provider to complete the education around busy schedules from the comfort of most internet enabled computers. When submitting your request, request web-based training within the CI Additional Details free text box.

Completing the Education Request Form

➢ Click here to access the Education Request form directly. Alternatively, access the **Self-Service Portal** from the intranet homepage and type "Education" in the search bar and select **Clinical Informatics Education Request** (shown below).

Start typing in the search box first, if you don't find what you need click Open a Ticket

education

Clinical Informatics **Education** Request

➢ Enter name and contact information.
