

The Code Status and Treatment Restrictions order will be updated to replace the Per Behavioral Health Policy option with an Unable to Provide Consent option. When Unable to Provide Consent is used, a New Code Status alert will fire once every 12 hours for each user to remind them to reassess and modify the details. These changes will affect all hospitals and emergency departments using the Cerner Millennium system.

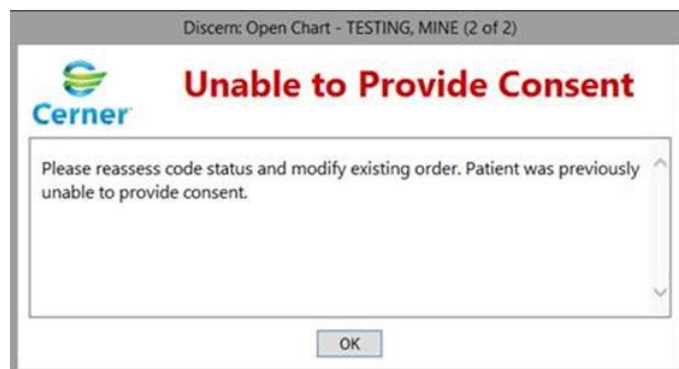

Code Status and Treatment Restrictions Order Update

Due to regulatory changes the Information Source details in the Code Status and Treatment Restrictions order are being updated. The Per Behavioral Health Policy is being replaced with Unable to Provide Consent.

➤ New Code Status Alert

- When opening the patient's chart, a new Code Status alert will fire for Emergency, Surgical and Inpatient providers and nurses to remind them to reassess the patient.
- The alert will fire once per user, every 12 hours for each user, until the Information Source details are modified.

For questions regarding process and/or policies, please contact your unit's Clinical Educator or Clinical Informaticist. For any other questions please contact the Customer Support Center at:
