

Providers can now place Cologuard orders and receive the results automatically within Cerner using the Exact Sciences Laboratories Cologuard HL7 Interface. This electronic interface will eliminate the need to complete the paper Cologuard Order Form and the need to scan the report into the patient's chart.

Placing the Cologuard Order

STEP 1: From the Recommendations component, click the Orders button in the Orders column on the Colorectal Screening row.

STEP 2: Select the FIT DNA order from the list.

- The order is added to the Orders for Signature dialog box.

STEP 3: Click the Orders for Signature tray () and associate a diagnosis using the diagnosis table.

STEP 4: Click Sign. Once the order is signed, it is sent directly to Exact Sciences Laboratories.

NOTE: The FIT DNA order can also be placed from the Actions drop-down menu in the Colorectal Screening. The order will also be in the Labs component on the ambulatory Quick Orders MPages.

STEP 5: Upon receipt of the order, Exact Sciences Laboratories will contact the patient with instructions for collecting and returning their sample.

STEP 6: Patient will collect his or her specimen and send the kit back to Exact Sciences Laboratories.

STEP 7: Exact Sciences Laboratories will result the patient's test and send Cologuard results back to the provider via the HL7 interface.

IMPORTANT: Once the order is signed, it cannot be edited. The order must be cancelled and reordered in Cerner. If a provider chooses to cancel a Cologuard order, a new order must be placed on a new encounter. When an order is cancelled in Cerner, the order has been closed on the Exact Science Laboratories side.

NOTE: When placing a FIT DNA order, it is important that the order is placed on an Ambulatory or Outpatient encounter. FIT DNA orders should not be placed on Between Visit encounters as the order will not be sent to Exact Sciences.

Orders placed outside of a face to face encounter (i.e. patient phone call, portal message, etc.) should be entered on the most recent visit encounter for your facility location. It is important to review orders on the last office visit encounter, however, as there can only be one FIT DNA order per encounter.

In the event the FIT DNA order had previously been ordered on the last office visit encounter, go to the preceding office visit encounter for your location and place the order.

Receiving Cologuard Results

- With the new interface, Cologuard results will flow to the **Results** section of the ordering provider's Message Center.
 - This is the same section that in-system lab results will appear.
- Results will be viewable in the patient's chart in the **Results Review** tab as well as the **Labs Flowsheet** on the workflow MPages.

Reviewing Results

- Follow-Up Action Needed

If the FIT DNA results requires follow-up to be completed by the clinical or office staff, please follow the workflow below. This is the same workflow currently performed for Results completed in the NLH system.

STEP 1: Double-click the patient line in Results folder to open the Review Pane.

STEP 2: Click drop-down option **Create** in the review pane toolbar and select **Staff Message**.

STEP 3: Enter the appropriate practice pool or individual in the **To:** field.

STEP 4: Update the Subject line.

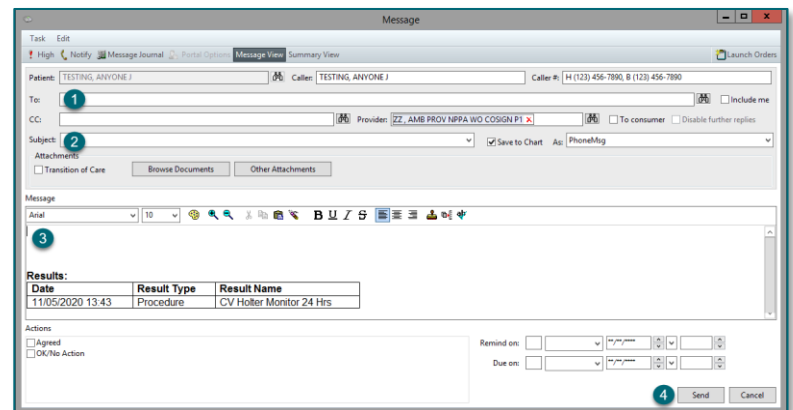

- Examples, "Schedule Follow-Up,"
"Result Follow-up"

STEP 5: Enter any further instruction for staff in the Message window.

STEP 6: If desired, select reminder parameters.

STEP 7: Click **Send**.

STEP 8: The result window will display again. Endorse the result by clicking **OK** or **OK & Next**.

NOTE: If the patient is signed up for the patient portal, the **Consumer Message** option will be available to select. Results and communication can be sent to the patient using this option, if available.
