

This Quick Reference Guide (QRG) demonstrates the use the camera capture feature on handheld devices.

Using Camera Captue

From the patient chart:

STEP 1: Display the patient chart menu by tapping **Patient Chart Menu** icon. 

STEP 2: Tap **Media Gallery**.

NOTE: In the Media Gallery, use the ellipsis button to group images by content or date.

STEP 3: Aim the handheld device at the wound and tap the **Camera** icon. 

NOTE: If dissatisfied with the image, tap the red X icon to try again. 

STEP 4: If happy with the image, tap the green **checkmark** icon. 

NOTE: The system names the image according to the date and time of the capture. To make the name more descriptive, change the image name using the following format: wound number, laterally to mirror iView label (dynamic group).

STEP 5: Tap **Save**.

NOTE: The system returns to the camera, so if needed, another picture can be taken.

STEP 6: Tap the **Back Arrow** to return to the patient's chart.
