
This Quick Reference Guide (QRG) demonstrates to providers the process of reviewing patients positive for delirium within the Delirium Assessments and ICU Liberation Worklist and use of the Delirium Management PowerPlan.

Review Delirium Assessments and the ICU Liberation Worklist

When notified that a patient assesses positive for delirium, review nursing assessments. Then manage delirium using the Delirium Management PowerPlan. Remember to discuss delirium status in daily rounds and incorporate it into a patient's plan of care.

Review the Delirium Assessment and Delirium Results for One Patient

➤ From the Inpatient 2018 MPage:

STEP 1: Click **Scales and Assessments** to open the component and display the delirium assessment result.

NOTE: The position of a component can be changed in the component list by clicking and dragging the component. To keep the changes, click **Exit** in the toolbar when leaving PowerChart.

STEP 2: If the patient is in the ICU, open the **ICU Liberation Bundle** component.

STEP 3: Review the results.

NOTE: **RASS and CAM ICU results populate here.**

Configure and View the ICU Liberation Worklist

Use the ICU Liberation Worklist to check delirium results for multiple patients simultaneously. To view delirium results for pediatric patients, use the PICU Worklist.

STEP 1: Click **ICU Liberation Worklist** in the toolbar. 

STEP 2: Click the **Patient List** dropdown arrow to select the patient list needed.

STEP 3: Click **Establish Relationships**. 

STEP 4: Click the **Relationship** dropdown arrow.

STEP 5: Select the appropriate relationship.

STEP 6: Select the **Select all** checkbox to select all patients.

NOTE: **If preferred, individual patients can be selected.**

STEP 7: Click **Submit**. The ICU Liberation Worklist now displays the selected patients. 

NOTE: If the Delirium column is not visible, complete these steps:

- a. Click the Page Menu icon in the upper right corner to move it into view. 
- b. Click Layout Configuration to display a list of pinned columns.
- c. Click the Delirium column and drag it to a higher position in the list.
- d. Click Apply to keep the changes. 

STEP 8: To bring the delirium patients to the top, click the **Delirium** column header.

Use the Delirium Management PowerPlan

Manage the patient's delirium using the Delirium Management PowerPlan. The Delirium Management PowerPlan is used for both Med/Surg and ICU patients.

➤ **From the patient's chart:**

STEP 1: In the PowerChart menu, next to Orders, click **Add**.

STEP 2: Enter the first few letters of the word delirium to search for the Delirium Management PowerPlan. Then click the **Search** icon. 

NOTE: The PowerPlan can be added to favorites.

- a. Right-click Delirium Management Adult.
- b. Click Add to Favorites.
- c. Click OK to confirm the addition.
- d. Click the Star icon to display the list of favorites. 

STEP 3: Click the **Delirium Management Adult** PowerPlan to select it.

STEP 4: Click **Done** to open the PowerPlan. 

NOTE: At the top, there are guidelines describing the PowerPlan and when it should be used, as well as recommendations for managing delirium. This PowerPlan is used for all patients regardless of location in the hospital. In the section that follows, the Universal Precaution Measures and the CAM Positive Interventions that nursing is implementing to address the patient's delirium.

STEP 5: Scroll down to the **Activity** and **Medications** sections.

STEP 6: Review the information in the **Activity** section and the **Medication** recommendations in yellow, such as tapering or discontinuing medications.

STEP 7: Select the appropriate order checkboxes to manage delirium.

STEP 8: Click **Initiate Now**.

STEP 9: Click **Orders for Signature**.

STEP 10: Review the orders; then click **Sign**.

STEP 11: Click the **Refresh** icon to see the initiated PowerPlan.
